

Part 15 - True Constitution Why The Flag?

SYMBOLOLOGY OF THE NUMBER 12, 2ND JUNE 2021

The Higher References to the Metaphysical meaning of number 12 represents unfettered power that one must establish permanent resolutions of purity and covenants of conformity with the Higher Laws of Obedience. Divine Obedience seems to be a simple matter, but the 12 Mind Powers of Man are the Fundamental Divine Qualities and Virtues of the Christ Consciousness that must be developed within men and women before Perfect Expression can be Used. Jesus could not Ascend before He Himself completely integrated these Divine Mind Powers which were evident within the Apostles that He surrounded Himself with. Here is the list of Apostles and the Mind Powers they held within themselves.

There are 12 Apostles and 12 Mind Powers

| DISCIPLE (Masculine) | DISCIPLE (Feminine) | Faculty | Chakra | Colour | Physical Data |
|--------------------------|------------------------|---------------|---------------------|----------------|--------------------------------------|
| PETER | LYDIA | FAITH | Crown | Royal Blue | Cerebrum of Brain |
| ANDREW | RUTH | STRENGTH | Spine as Conduit | Lemon Yellow | Spinal Cords and Nerves |
| JOHN | REBECCA | LOVE | Heart | White | Heart and Circulatory System |
| JAMES Son of Zebedee | MIRABISHA | WISDOM | Third Eye | Green | Pituitary Gland and Endocrine System |
| MATTHEW | MARY of Magdalene | WILL | Throat | Sky Blue | Respiratory System |
| PHILIP | MARI MARTHA | POWER | Throat | Deep Aqua | Larynx, Muscles and Limbs |
| NATHANIEL Bartholomew | LOURDA | IMAGINATION | Third Eye | Crystal Clear | Thalamus |
| THOMAS | SARA | UNDERSTANDING | 5 Minor senses | Cream Yellow | Touch, Smell, Taste, Hearing, Seeing |
| JAMES Son of Alphaeus | ELIZABETH | ORDER | Solar Plexus | Mustard Yellow | Digestive System, Skeletal and Skin |
| SIMON The Cananaean | JUDI | ZEAL | Third Eye | Rosy Pink | Hypothalamus and Medulla Oblongata |
| JUDAS Iscariot | MARI Of Canaan | REGENERATION | Regenerative System | Ruby Red | Reproductive System |
| JUDE Thaddaeus | MIRIAM | ELIMINATION | Sacral | Violet | Urinary System and Colon |
| JESUS CHRIST | MARY MAGDELENE | LIGHT BODY | 'I AM' Presence | Gold | Light Body |

Man and the Universe Vibrate to the Resonances of the Power of 12. There are 12 Dimensions in this Universe, and each one Vibrates Higher than the one below it in terms of Frequency. They directly correspond to the 12 States of Consciousness, mentioned above, that exist in

our Universe. Your Powerful, Supernatural abilities begin at the 5th Dimension, and grow more powerful as one expands Higher.

There are 12 primary chakras in this Universe, as well as the Seven Chakra Energy Centres within our body, and five above it. Giving you a direct connection to the Entire Universe!

And according to Kryon, there are Twelve Layers of DNA in the physical body. Each of these corresponds vibrationally back to their Chakra counterpart. And that's only a very small of the incredible Design of the Human Biology.

The number 12 is a number of polarities. This is because it contains both numbers 1 and 2 in a unified whole. In this respect, number 12 is about reconciling opposing tendencies and harmonizing apparently conflicting ideas. The number 1 is all about independence and optimism, leadership and taking the initiative. Number 2, on the other hand, is about trust and cooperation. In a way, these two numbers contrast sharply with one another. However, from another perspective, they go hand in hand. When you see Angel number 12 appearing it is likely a message from your guardian angels to remain optimistic about the future, as you are likely on the verge of some positive changes in the near future.

Spiritual growth is often much more difficult and trying than you might expect, and it is this aspect of Spiritual life that is symbolized in Angelic number 12. Reconciling the seemingly opposing aspects of the Spiritual Path can be difficult for anyone. When your Guardian Angels send you Messages containing the number 12 it may mean that making progress on your Spiritual Path may mean stepping outside of your personal comfort zone. Achieving your personal and Spiritual Goals may mean having to take a leap of Faith. Our Higher Selves want us to live abundant and fulfilling lives. For this reason, they provide us with the Inspiration and Encouragement we need to reach our Highest potential. In this way, 12 is often a Sign that we will soon be receiving Higher Energy from our Spirit Guides and Helpers.

Like 13, 12 is a Message of Love from Spirit that by Trusting your Higher Guides you can reach Higher Energetic Levels that will help you reach your Fullest Potential and find your Higher Purpose in Life.

Seeing 12 is a wake-up call to Re-evaluate your intentions and plans. What do you desire the most? How does your Perfect Life look like? Who is part of your Perfect Life? How do you spend your time? You need to take time to review your Priorities and start working on those that are Leading you to your Desired Life. Think about what people you want to have by your side. Who are those who Lift you up and Support you?

Every time you see this number Know or something that represents this number know your Life is about to take a Shift in Consciousness and things will change. Success and Growth are following you everywhere you go. You are blessed!

12-Pointed Star Geometrical Symbolism.

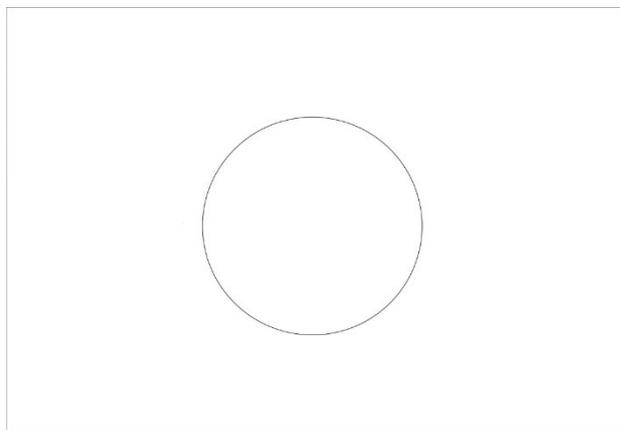

Detailed and Explained by James Brown in a talk to the Lucis Trust.

https://www.lucistrust.org/blog/triangles/12_pointed_star_and_the_new_age_symbol

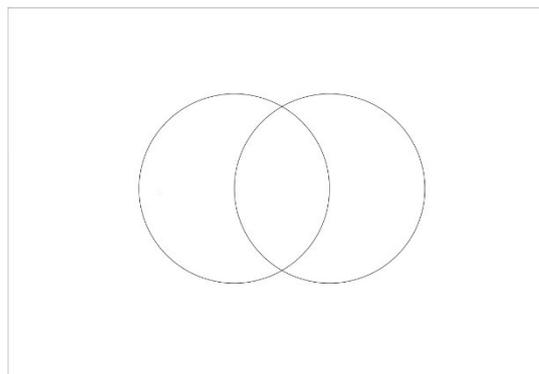

The 12-pointed star can be seen principally as a symbol to represent the quality of Divine wholeness and integrity in this work we do together. It is a very stable construction of four intersecting equilateral triangles which is repeated as an Inner Star as well as an outer one.

An explanation of its geometric construction may help us understand its significance.

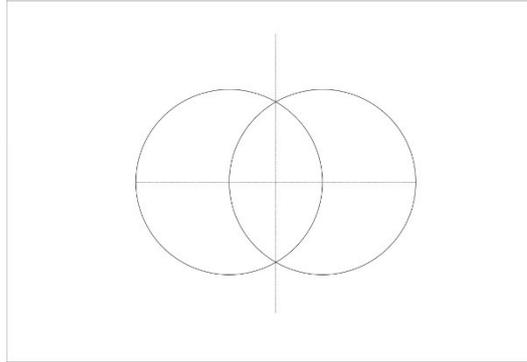

A single circle is drawn.

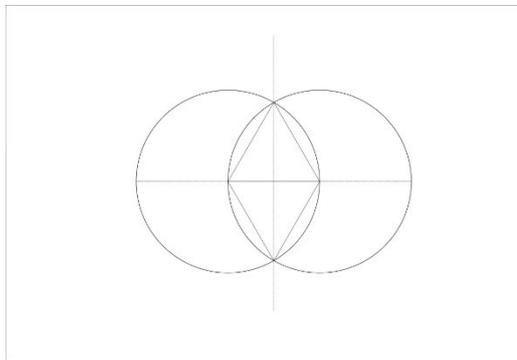

A second circle is drawn with its centre on the perimeter of the first circle.

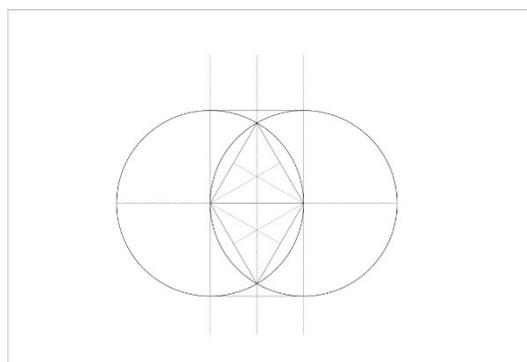

Horizontal and vertical axes are drawn through the centres of each circle and the points of intersection between them, respectively. This overlapping space is called in Latin the Vesica or Vesica Pisces as it looks a like a fish, vesica translates to vessel in English. In Christian symbolism this is the location of the mediating Christ Principle, or as we may name it, the location of the Soul with the two intersecting circles symbolizing Spirit and Matter.

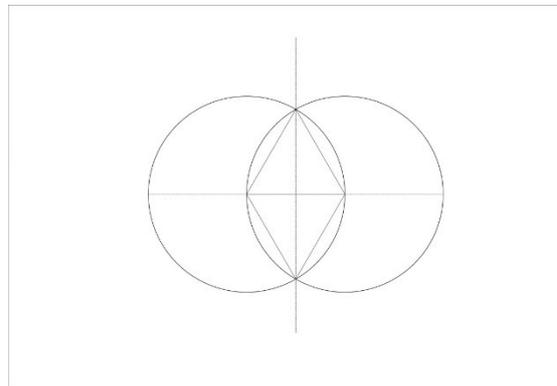

Two equilateral triangles can now be drawn within this space between the two circles. We can say that these two triangles are born from the womb of this Vesica or Soul space.

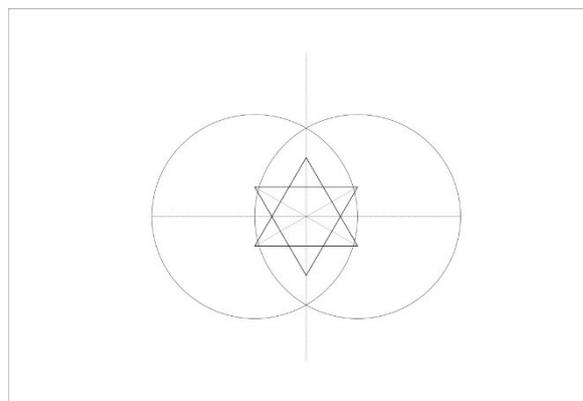

It is interesting to note that with a very economic addition of 4 more lines we have 2 squares added to the diagram each sharing a common base line with its own triangle.

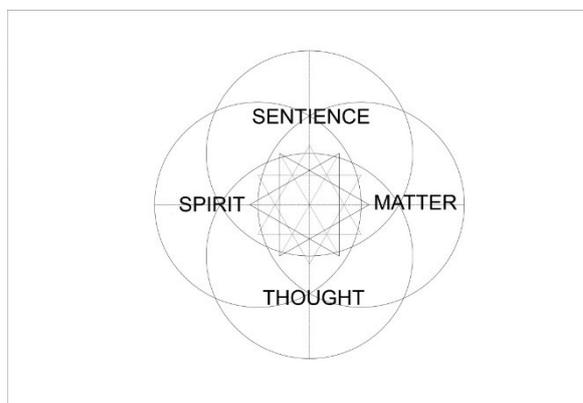

If we identify the upward pointing triangle as representing Spirit and the downward pointing triangle as representing Matter, then in this scenario we can assume that they will want to come into closer aligned relationship with each other and also with the centre of the Vesica they inhabit. Therefore, they will start to move downward and upward to find the common centre.

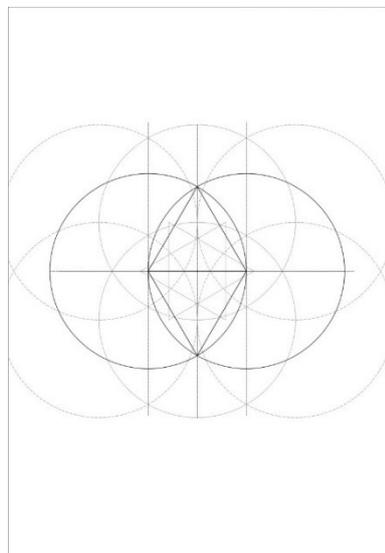

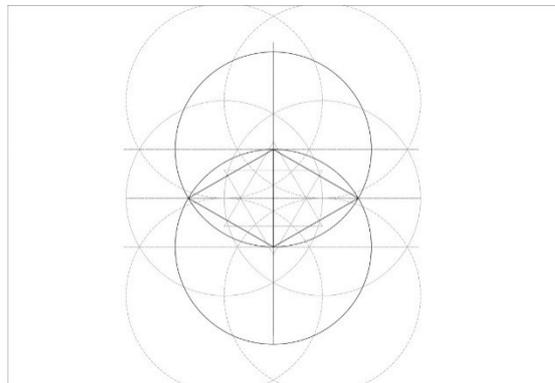

The destination point of this journey of these two aspects of this Life is the 6-pointed star we all know so well from Judaic and Hindu symbolism.

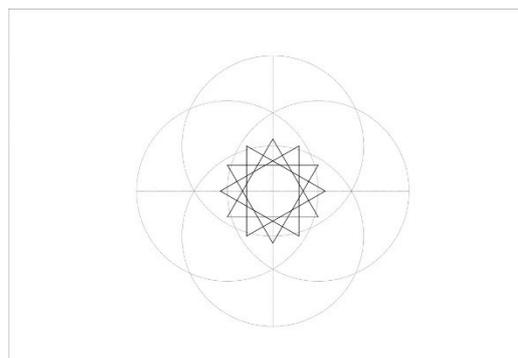

So, we have the primary relationship of Spirit, Matter and the intersecting Soul star at the centre.

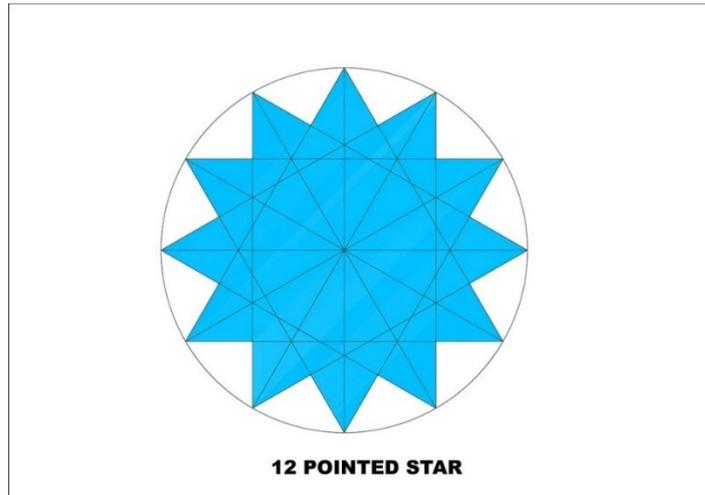

We can now repeat this creative process by drawing two more identical circles at 90 degrees to the first two and repeating the triangulation within the corresponding Vesica.

We now have a 12-pointed star borne out of 4 equal circles. We can at this point name these 4 areas of Life which together form a human being, Spirit, Matter, Sentience and Thought. So, we have a Universal map of the Soul encapsulated in this diagram.

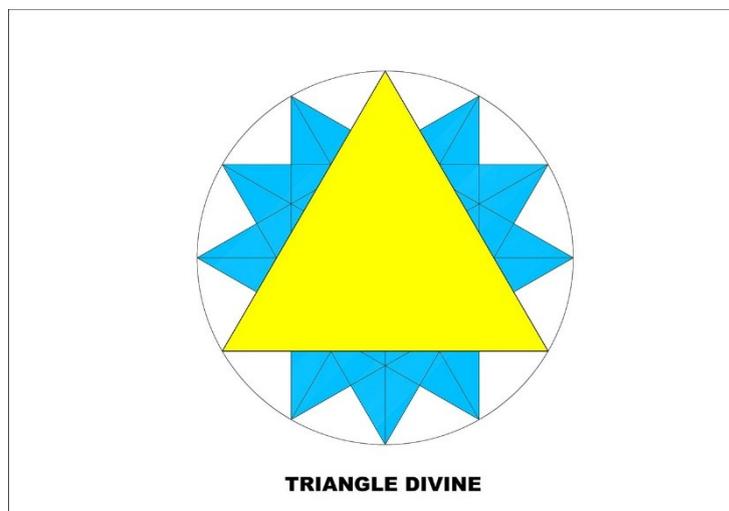

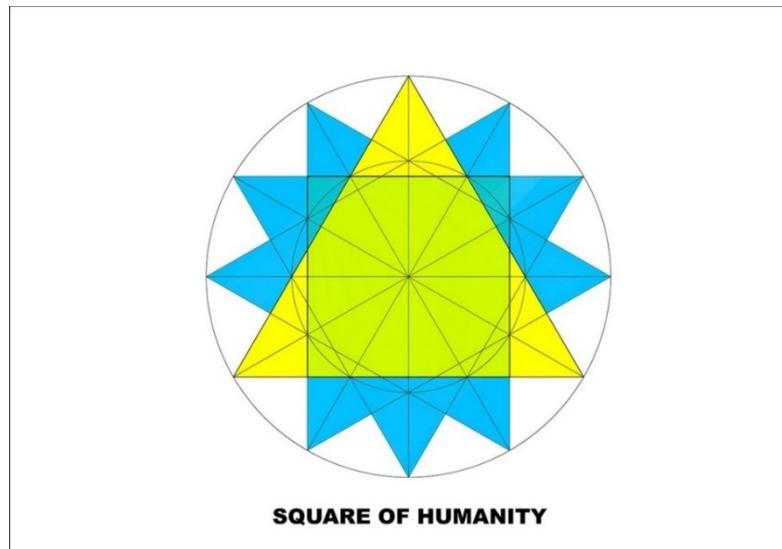

We can now look at this symbol as an aid to meditation and alignment within the Triangles work. The stability and intersection of the lines leads the eye in towards the centre of the star and allows the mind to focus in on this point from where all the lines radiate, resting there and achieving stillness so that the higher mind or higher Self can be contacted.

If we imagine that this central point represents the Will Aspect of God, then we can hold this symbol in mind as we say the Invocation of the Will at the beginning of the Triangles meditation. *“In the centre of the will of god I stand, naught shall deflect my will from His”* All this said while focusing on the central point of the star.

Then we say: *“I implement that Will by Love”* Here one shifts focus outward to become aware of the 4 surrounding intersecting triangles which symbolize the 4-fold expression of human life, 3 triangles representing the personality and the fourth central upright triangle as symbolizing the Soul *‘the Triangle Divine’*.

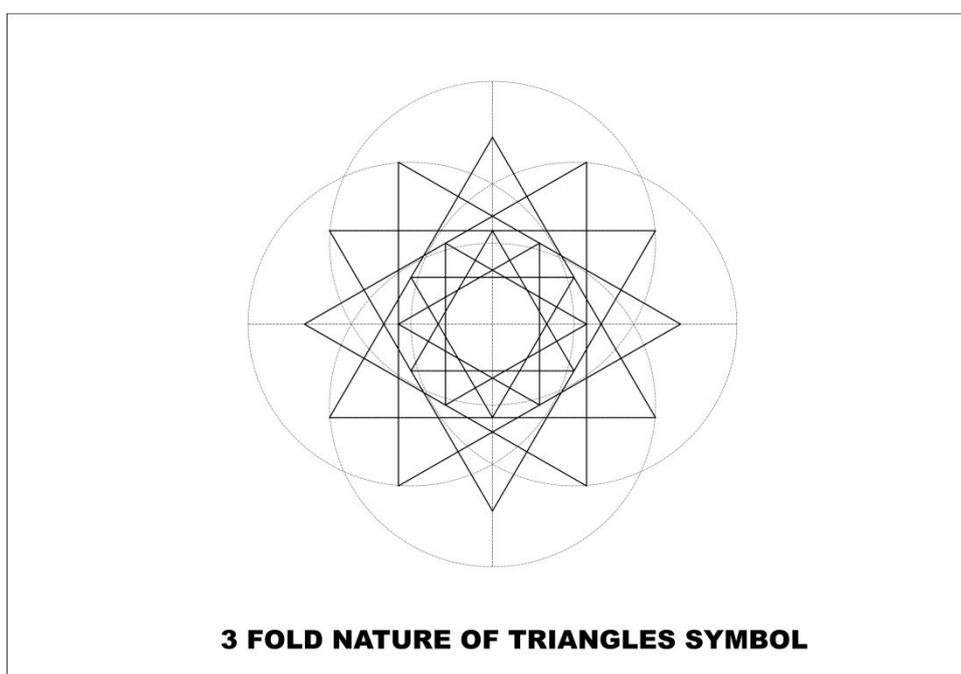

Then we say: *"I the triangle divine work out that will within the square and serve my fellow men"*.

As can be seen from this diagram, the square representing Humanity is located centrally within the star and relating to the triangle of Soul which stands behind it.

So, we can use this 12-pointed star as an aid in focusing our consciousness during the Triangles meditation encompassing as it does the 3 levels of consciousness with which we are working, the Spiritual Will (the central radiating point), the Soul or Love aspect (the central triangle) and the Human field of daily life (the square).

If we return to the Triangles symbol, we can see that there are 2 stars, an inner and outer. The star form has fractal properties so that by the halving or doubling of its dimensions we can increase or reduce its size ad infinitum.

Three relationships to point out are:

The central 'Triangle Divine' in the Triangles symbol relates geometrically in spatial terms to the yellow triangle of Hierarchy in the New Age Symbol. As we are told in Foster Bailey's essay this yellow triangle of Buddhist Consciousness has 3 powerful loving intelligences at each of its corners who are helping us at this time to make the transition into the new Aquarian paradigm. The Lord Buddha, The Spirit of Peace and Equilibrium and The Avatar of Synthesis.

The second relationship is the location of the central white Cross (unseen in these diagrams but superimposed just the same), inside the inner 12-pointed star of the Triangles symbol, relating the ideals of the coming Aquarian Age to the outer star representing our present world of human activity. So at the central point of both symbols, the centre of the Will of God and the Coming One are co-located bringing us visually and symbolically an expression of Coordinated Unified Purpose at the Centre of our Planetary Life.

The third relationship of note is in the inner square, formed by the intersection of the inner star of triangles and the circle which circumscribes the central Cross, the surface areas are approximately the same of these two forms. The relationship expresses an ancient relationship called the '*squaring of the circle*'.

Robert Lawlor in his book '*Sacred Geometry*' says this, '*the circle represents pure unmanifest spirit-space, while the square represents the manifest and comprehensible world. When a near-equality is drawn between the circle and the square, the infinite is able to express its dimensions or qualities through the finite.*' This reminds us of the esoteric work of '*linking the inner world of Light and the subtle world of glamour*'.

I hope this geometric exploration can contribute a little to our understanding and we can ponder on the significance of these interrelated symbols and their usefulness in the Triangles work we do together. Thank you.

James Mills

.....

As we are speaking here about the symbology's of the Cross we must also include that which is Unseen at Present within the Central Circle of the Flag for this '**True Constitution**' and '**I AM' One World Nation**. This is St. Germain's Maltese Cross!
