

The Transfiguration of Base Metal into Gold

The timing for the New Moon on the 9th of September has the Sun and Moon at 17^o Virgo. All New Moons mark a new start, a new cycle, they are times for setting an intent which will develop and grow through the lunar cycle.

In the case of this New Moon the energies of new beginnings is in many ways intensified as the underpinning 9/9/18 (9) date has all to do with completion and starting afresh with focus and awareness.

Since July we have been passing through an intensified period with much internal realignment going on and now we are being encouraged and directed to express our unique, true Self - to weave and allow Unconditional Love to flow into every aspect of our Life, basing our Life on the principles of Selflessness, Integrity, Compassion and Harmony.

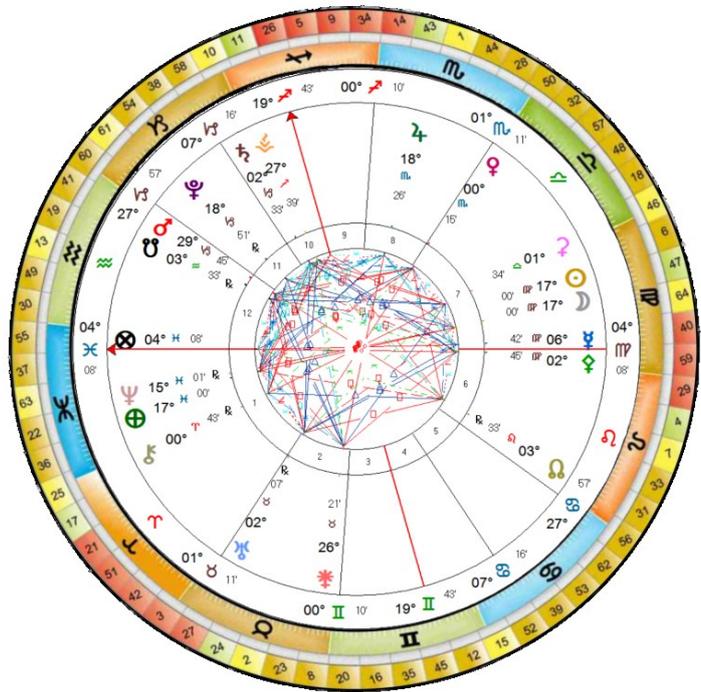

With so many of the planets having been retrograde for these last weeks, we have been in many ways forced to truly look inwards and, now as the planets begin to go direct, it is as if a brake has been released and we are being impelled to truly step into our Soul's calling – to be of Service to Humanity and to Gaia as a whole.

You will see on the next page the chart and Gene Keys that are being highlighted through this New Moon which will be underpinning each of our DNA blueprints. Our DNA connects directly into the Matrix, there is no separation, other than our own self-imposed fears and belief patterns that have been handed down to us over generations.

The Sun, Moon and Mercury in Virgo have much to do with this purification of emotions and thoughts - sorting the wheat from the chaff - linking to a time of 'Harvest'.

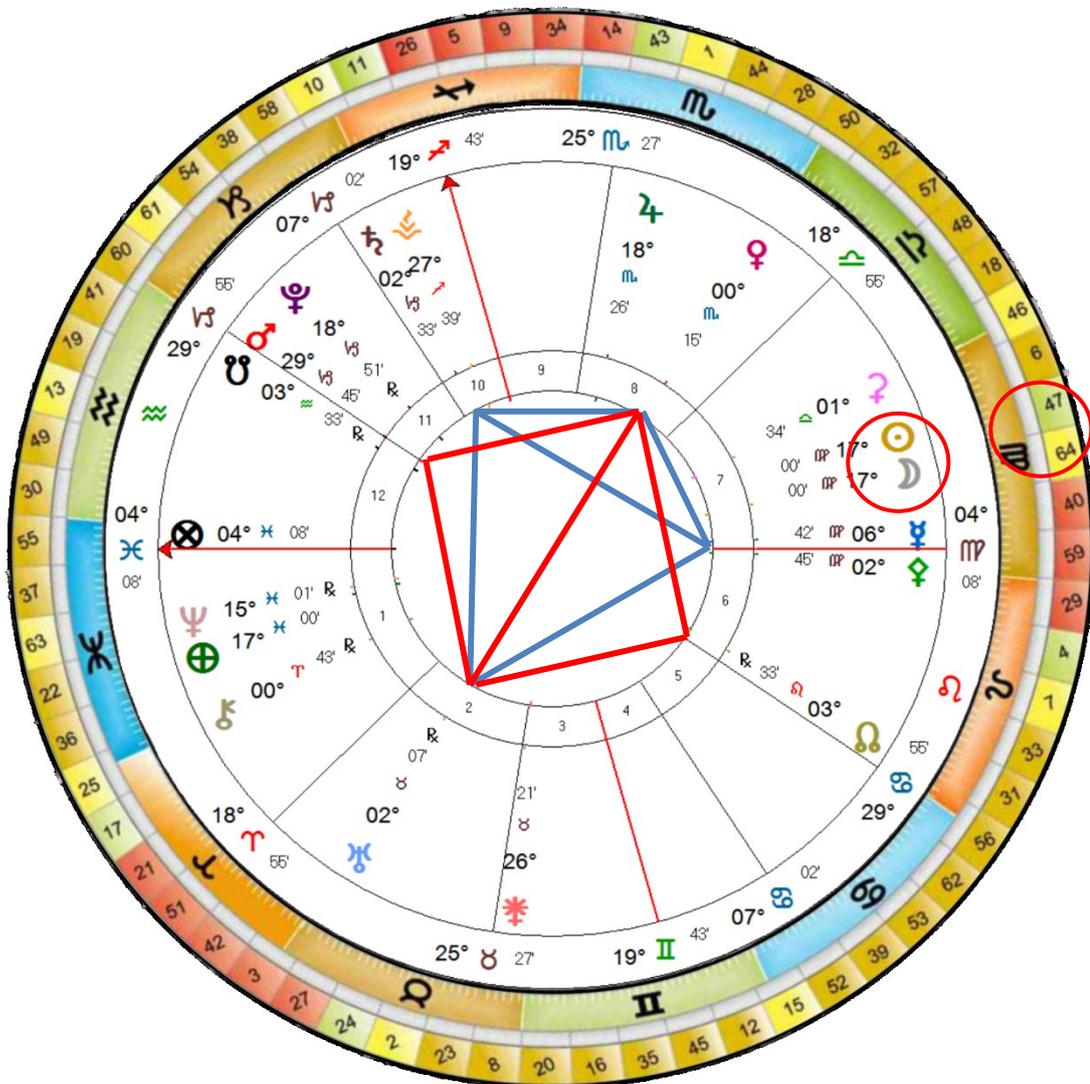

For it is in Virgo that the integration of the Soul is externalised onto the physical plane. Esoterically Virgo is the sign of the 'Hidden Christ' as it represents the internal gestation and birth of the Soul force, the Christos energy, the Grace of Divinity that dwells within each of us.

The wellbeing of Gaia and all of the Life Forms on Earth is the central focus at this time, for there are seven cosmic bodies in the Earth Signs, (*Sun, Moon, Mercury, Mars, Saturn, Uranus and Pluto*) all resonating to a 'grounding' principle which has a direct link to manifestation on the Earth Plane.

The Sun and Moon at 17° Virgo are on Gene Key 47, known through the I Ching as *Transmuting the Past* - from *Oppression to Transmutation to Transfiguration*. We, as Humanity are the 'grounding staffs' for the highest frequencies and resonances to be embodied and anchored through the **Transmutation** and ultimate **Transfiguration** of each one of us, so that we may *Be, Express and Demonstrate the Light and Love of Universal Consciousness*.

The 47th Siddhi reveals the ultimate purpose of the non-coding (junk) DNA within the body, which actually does code for a process within the physical body. The Life of Jesus Christ is in fact the perfect enactment of all the stages of **alchemical transmutation ending in this state of Transmutation**. The force of transmutation strips you emotionally and mentally to such an extent that it eventually reaches down into the physical matter of your body. The power of the myth then takes over and the very cells of your body begin to transmute into the pure light frequencies from which they are made.

The elements that make up your body were made in stars and you turn back into a star in your own mini supernova. **This is the Unio Mystica or Sacred Marriage** in which all your constituent elements dissolve back into one another and out of your base matter symbolic gold is formed. **Humanity stands upon the threshold of one of its great Transmutations.** As

*each individual faces, embraces and transmutes the collective fear that lies within the heart of every human's DNA **we are Transfigured by Divine Grace** – accessing the Divinity that lies within each and every one of us.*

17⁰ Virgo is the exact point for the cross over from Gene Key 64 to Gene Key 47 for it marks not only the beginning of Gene 47 but also the end point of Gene Key 64.

As such 17⁰ Virgo would seem to encapsulate and embody a powerful Alpha and Omega point of Consciousness, which again reinforces the theme of endings and beginnings which really speaks of a pivotal point in the evolution of Consciousness which is continually and consistently spiralling through Time and Space.

*'When Illumination floods your Being, it also takes possession of your mind. **In this sense to be Illuminated means to think God's thoughts.***

*At this level the Mental Body gives way to the Causal Body. **At the Divine level your Causal Body/Soul becomes your physical vehicle.***

Once the frequency of inner Light illuminates physical form, that form begins to ascend. Physical ascension is directly dependent upon Divine Will.

*The 64th Siddhi of Illumination is the direct expression of Divine Mind. **Divine thoughts manifest instantly in the world of form – such is their power.** Thus one in the Siddhic state of Illumination directly experiences Divine Creation. **To be Illuminated by the 64th Siddhi is to remain empty,** while being constantly flooded with the Light of the inner aurora – it is to be an easel for the imagination of the Universe itself.'*

All of us have been spiralling through Time and Space to come to this pivotal point of Remembrance – for as William Buehler, a truly humble man and a master of the Reshel Grid said **'This is more than a New Age, it is the completion of the work of all the Ages....my main message is that we have no other more demanding task now as Souls and as a Cosmic Race than to facilitate this Ascension.'**

As we each transmute and release the past we have the ability to act as the clear Grounding Rods for this next cycle of Life's expression, leading Souls out of aeons of Oppression into the Pure Light of Transfiguration.

All Love and Blessings
