April 2019

**There is nothing static in the Universe in which we dwell.  
We can change by changing our attitudes and patterns of behaviour  
In so doing we change our Destiny**

# 'I AM' THE LIGHT OF LIGHT ITSELF

Aries is the first sign of the Zodiac composed of Fire Elemental and Cardinal in nature - it is the Pulse of Life Itself! In the Northern Hemisphere it is Springtime when new Life manifests - leaves are shooting and buds are opening, the start of a yearly cycle. As revealed by Nature the Aries Light contains the Divine Impulse

that impregnates matter and that sets the tone for the upcoming Celestial year.

New Moon 5<sup>th</sup> April 2019 9:50 BST London UK  
<https://www.timeanddate.com/moon/phases/>

At the time of this New Moon the Sun and Moon will be together at 15 Aries 17 and the chart has an intensity and a focus that reflects the Cardinal Fire energy of this Zodiacal constellation

Aries at the personality level is experienced primarily through the Planet of Mars and there is a desire to win and to conquer, a 'me first' attitude which pervades all instinctive reactions.

At a Soul-personality level the Aries energy is still linked to the Planet Mars but the actions become far more directed - the focus is now upon using ones energy not just for self, but also for the good of others. There becomes a conscious focus on attainments that will benefit Society.

At this point the 6<sup>th</sup> Ray of Devotion, that underpins Mars, manifests beyond egoic selfish desire so that the individual becomes an instrument for social reform. As the individual continues to evolve as a Soul, the Planet Mercury, ruled by the 4<sup>th</sup> Ray of Harmony through Conflict, begins to have more influence than Mars and, as all the previous experiences of life are synthesized, he/she begins to take conscious responsibility for the correct use of Will in each and every moment. Guided by intuition and working with the Plan, at this level the Soul is a conscious expression of the Will to Good.

The Stellar Constellation of Aries flows with the Light of the 1<sup>st</sup> and 7<sup>th</sup> Rays - the Rays of Will, Power, Order and Manifestation. Symbolised by the Ram the Aries archetype flows with vibrant energy, courage, quick action and fearlessness evolving through time from the instinct of 'Blind Will' to the 'Struggle with Will' and finally to the 'Purposeful Use of Will.'

Ultimately, Aries is the channel that provides, through Mercury, for the expression of inspiration - thoughts and ideas that are birthed from the Mind of God - Universal Source.

Over these last years the energies and Light that have been flowing to Earth have been intensifying and refining our consciousness, which is opening the way to eventual direct connection with Shamballa.

This is the point of Light found at the Centre of the Cycle of Manifestation faint and flickering. It is the 'Searchlight of the Logos' seeking that which can be used for Divine Manifestation.

# CHART FOR THE NEW MOON APRIL 2019

So how will this New Moon underpin, seed and assist the upcoming cycle around the Constellations?

As you can see from the above chart there is a Grand Cardinal Cross at the time of the New Moon bringing the Sun and Moon in Aries (Gene Key 51) together with the Planets of Saturn and Pluto and the South Node in Capricorn (Gene Key 61) with Pallas Athena conjunct the Earth in Libra (Gene Key 57) then the North Nodal Point in Cancer (Gene Key 61) completing this Cardinal Cross.

This combination of planetary aspects gives a driving force to the energetic with a focus on our mental capacities and how we utilise words and ideas to bring harmony out of discord.

At the time of each New Moon the Sun and Moon come together linking the Conscious and Subconscious aspects of self - allowing for a greater fusion and understanding to take place within each of us - it also requires that we need to be scrupulously aware of our inner thoughts and feelings as we begin this new cycle of heightened and refined energy.

The Sun and Moon in Aries has much, if not all, to do with Aspiration - the desire to create, manifest and achieve - to do it 'Now'! There is an inbuilt impulse to succeed with this Cardinal Cross, but with one caveat that there is no impatience, for it will require focus, inner stillness and patience for this seed to take root and to flourish through the coming year.

The Cardinal energy, of Aries, Cancer, Libra and Capricorn has great impulse, but it can often lack the staying power of the fixed signs of Taurus, Leo, Scorpio and Aquarius. However, as Saturn and Pluto are such a central focus at this time, it indicates that with steady, determined and focused action, Transformation is the keyword underpinning this next twelve months.

The Sun and Moon on Gene Key 51, known as **Initiative Leading to Initiation** is moving from the **Shadow of Agitation to the Gift of Initiation** to the **Siddhi** frequency of **Awakening**.

*'At the Shadow level there is an innate human competitiveness with the need to be first in order to feel superior to others - other people can be brushed aside in a struggle for self-advancement. At this frequency the perceived randomness of life creates a deep insecurity in human beings because of this underlying fear that something bad could happen to you at any moment. Shocks are a part of all human life but at the Shadow level the possibility and fear of shock continually unnerves us. There is a profound lack of trust in life.'*

The 51<sup>st</sup> Gene Key is a portal – the portal through the Shadow frequency leads to hell whereas the 51<sup>st</sup> Gift leads to a place of great personal empowerment and genius. The Gift level is engaged whenever the human competitive spirit is put into the service of creativity. It is not possible for a human being to awaken without first stepping fully into their creative independence. It is a journey into the underworld in which the traveller will confront many challenges and tests.

**A path that leads home – it is a path of heart leading into the heart.** This is the battle with your own fears but rather than being a struggle there is a leap into the Higher Self. These people come to awaken the collective consciousness out of its fear-based modality. They are not leaders – they are initiators.

Awakening is beyond spiritual jargon and systems. Simply and clearly you're either awake or you're asleep. Until you are awake, you are asleep. There are no levels within Awakening. **Awakening is a spontaneous evolutionary leap made possible by wider evolutionary forces operating throughout the entire Universe.**

Awakening is a sudden unexpected shock in awareness that is preceded by a mutative chain reaction throughout the cells and DNA....**It is the permanent dissolving of the separate self** as a physical mutation in the body - an experience that cannot be predicted or influenced.

The 51<sup>st</sup> Gene Key is part of the Ring of Humanity and this Gene Key ensures that one day all of Humanity will awaken. **In times to come this Siddhi will begin to awaken entire gene pools.** There will come a time in which relationships will awaken, then families, then entire communities until finally humanity will awaken as an individual Cosmic Being and will see its own true nature.'

To realise this potential, Mankind has to move through the levels of fear which underpin all of the 64 Shadow archetypes. The Earth at the time of the New Moon is on Gene Key 57, known as **A Gentle Wind** which is assisting us to move through the **Shadow of Unease** to the **Gift of Intuition** and finally to **Clarity**.

*'To understand more precisely what we mean when we use the word fear, it may help to reduce it to a certain range of frequencies. If fear based states fall into a particular waveband then we can see how easy it might be to adjust our own frequency and raise ourselves above this fear band. This does indeed sound easy.'*

*However we have to remember that Humanity collectively vibrates within the fear band frequencies. Therefore, as human beings, there is enormous pressure to resonate within these same frequencies.'*

*'When you begin Interacting harmoniously within the Now and interfacing organically with the material realm you have moved into the Gift level of this Gene Key. Here you experience a deeper sensitivity to everything and everyone around you. You are able to make positive use of the natural guidance system known as the 6th sense or Intuition...Now you are using intuition as your most innate and powerful compass. You are attuning yourself to the gentle and subtle voice within and living with greater ease and flow.*

*At the higher reaches of the 57<sup>th</sup> Gene Key you begin to access the ability to tune your clairaudience beyond the borders of Time. The Essence of Gentleness is one of the greatest secrets to life. Consciousness is the gentlest most subtle phenomenon. **Clarity is about seeing this softness at the heart of all things.** When you live your life In harmony with this softness your come into accord with what the ancients called the Tao – the transcendence of the opposites. **This Siddhi holds the secrets of miraculous healing through its special ability to attune to the subtleties of physical DNA.** Such gentleness opens the heart and leads to transcendence. If you allow it, it will transport you immediately into the world of the eternal Now. When someone attains enlightenment through this 57<sup>th</sup> Siddhi it manifests through them in an extraordinary and beautiful way – **they become a tuning fork for the Divine Presence.'***

Pallas Athena at 21 Libra is on Gene Key 32. Pallas Athena, the Goddess of Wisdom, links to the Higher Mind and with it activating this Gene it is emphasizing the power of Mind and, indeed, how we use our minds. Pallas Athena In Libra has the ability to harmonize two different polar extremes - the ability to see a third way beyond the opposing forces. Pallas Athena when operating from the higher levels has the power to heal with the Mind, bringing justice through diplomacy and mediation, always seeking the path of Peace and Integrity.

Gene Key 32 asks that we move out of the fear of **Failure** to the Gift of **Preservation** and on to **Veneration**.

*'One of the greatest fears for humanity is found in this shadow – the fear of Failure. Although the fear of this Shadow has its roots deep within the human immune system, it is the mind that reacts to it and feeds of it. If you are not aware of the power of your mind, then your mind will run your life which means fear will run your life.*

*The 32 Gift is not about self-preservation but is about the Preservation of Life. This Gift has the ability to assess the past, weeding out weaknesses and building upon strengths. As we move into the 32<sup>nd</sup> Gift, as a species, we will once again return to Nature. **Nature represents our roots and we, humanity, are the vibrant young shoot with its dreams of transcendence.** In listening to the great Wisdom contained within our ancestral past we have an anchor on which to graft our modern technological awareness. This fusion can bring true transcendence. It is through the manifestation of the Gift of the 32<sup>nd</sup> Gene that our Earth will be defended and Preserved.*

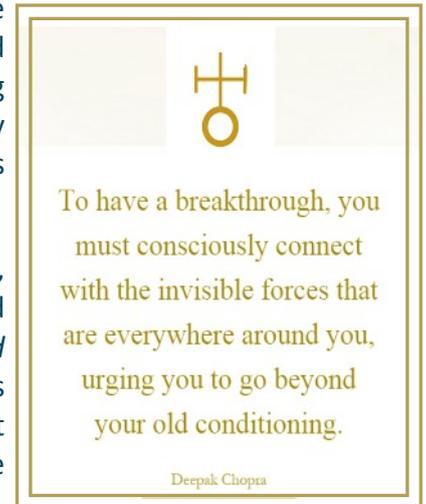

*Each of the 64 Gene Keys is essentially a process in which fear or anger is progressively transformed by being put to use in the service of the totality. At a certain point, however the ancient genetic fears can be transcended altogether. The 32<sup>nd</sup> Siddhi is the state of Veneration. It is all that remains when fear has burned away. **Veneration is the state that occurs when you see and know your place within the great Living chain of Life.** You stand on the shoulders of those who have come before you and you allow those who will go beyond you to stand upon your shoulders in turn. The more you contemplate the 32<sup>nd</sup> Siddhi **the more Veneration and reverence you will inevitably feel for all Sentient Life** – you will begin to smell the perfume of Divine Consciousness in all forms of Life.*

Before looking at the South and North Nodal Points it is relevant to share that Uranus just moved into Taurus at the time of the Spring Equinox, bringing the potential for a radical fresh approach as to how we perceive life on Earth.

Over the next seven years whilst Uranus is passing through Taurus, we are being asked to let go of any limitations that have held us bound within old structures and patterns of belief. The energy of Uranus, when coming through the fear based Collective Shadow has the potential to bring many changes and disruptions, to polarise through extreme beliefs and opinions as manifested back in 1934 - 1942, the last time Uranus was in Taurus.

However, there are many many Souls on the planet now holding the balance, the Middle Path, who are way beyond these old levels of Consciousness and who have had *'the ability to assess the past, weeding out weaknesses and building upon strengths,* so that this time, as Uranus transits through Taurus we will witness a fundamental shift in consciousness, a breakthrough, that will open profound potentials for all Humanity uniting us as One Humane Family, a Universal Brotherhood founded upon Spiritual Truth.

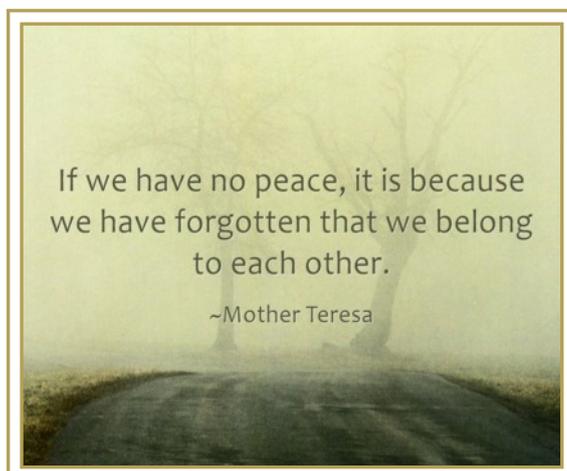

This potential is reflected within the Grand Cross. Both the South Nodal and North Nodal points, the Karmic past and the future Aspiration of the Soul are held within this Cardinal Cross along with Saturn and Pluto.

Looking at the South Nodal Point first, which contains all that has transpired, from the past you, will see that both Saturn and Pluto are either side of this nodal point - assisting us to firstly balance within our own beings this duality consciousness and then transmute, assimilate, integrate and digest all that we have experienced over lifetimes and timelines on our journey, both individually and collectively - to turn a fresh page. This turning of the page will be out pictured from many different levels of Consciousness and all are required.

For we are at a pivotal point, Saturn being the Gatekeeper to the Solar Consciousness and Pluto the Gatekeeper to Galactic Consciousness. Saturn holds our perception of our Third Dimensional field of Time, Polarity and Physicality and Pluto opens us to the Fifth Dimensional field of Timelessness, Non-duality and Monadic Awareness to our I AM Presence.

As already said, with Pallas Athena held within this planetary aspect, it is not an either or, but rather a fusion and synthesis of these fields creating and seeding the next level of human evolution which will no longer see itself as separate from each other, but as One Spiritual Consciousness manifesting in diverse forms.

The South Nodal Point, as at last month, remains on Gene Key 61 as the ***Holy of Holies*** moving from ***Psychosis to Inspiration to Sanctity*** and the North Nodal Point on Gene Key 62 ***The Language of Light***.

***'The Gift of Inspiration is Spiritual because it serves to loosen the hold of your mental constructs, opening and expanding your capacity for Love. Hiding inside every single unit of matter within the Universe is the mystery of Christ Consciousness, that quintessence of inner Light that holds all things together.***

***The 61<sup>st</sup> Siddhi is neither a place nor a state - it is the inner experience of Sanctity – of being one with the Divine. In the future the 61<sup>st</sup> Siddhi will become far more common place, because humanity is in the process of making a quantum leap.'***

And Gene Key 62 speaks of how ***'Words spoken with Love are deeply healing'*** and shares that ***'there is no return once you begin to speak your truth – you have broken away from the lower realms forevermore.'***

The planetary aspects at the time of this New Moon speak clearly to us that if we wish to evolve into this next level of Consciousness to become a part of the Galactic frequencies of Light our mental constructs and beliefs are central to this journey.

Uranus as it enters into Taurus reflects this back to us as it is activating Gene Key 3 ***Through the Eyes of a Child*** moving from ***Chaos to Innovation to Innocence***.

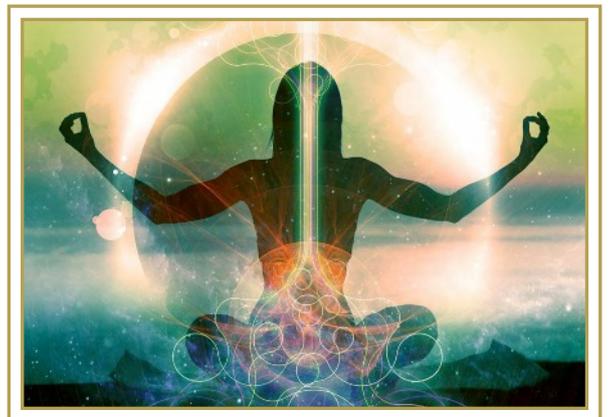

*'The Gift of Innovation is far more exciting than simply being creative. It implies that you have permanently escaped the fear-based perspective of the Shadow frequency. Innovation also requires a deep sense of inner trust. In order to be truly innovative you have to attain a very high frequency that allows you to go beyond the collective worldview. All preconceived notions, dogmas or beliefs must be discarded when they no longer serve the developing synthesis. The Gift of Innovation requires you to become as open hearted and open minded as a child.'*

And finally, to also assist us at this New Moon, Mercury, the planet of the lower mind thoughts, ideas and communication, is conjunct to Neptune, the planet most associated with the Soul in manifestation and as such the vehicle for Christ Consciousness. Both are on Gene Key 22 known as ***Grace Under Pressure*** moving from ***Dishonour to Graciousness to Grace***

***'The Gift of Graciousness might also be called the Gift of the Soul. It is the ability to live life to the full, holding no feelings back, whilst at the same time having deep respect for the feelings of others. At the Gift level you see that all is interconnected – all things and all people. The Gift of Graciousness allows us to learn through joyousness and fulfilment***

*The Siddhi of Grace is your true nature. It is your inheritance. It is the Soul of the World. It is also a state that is beyond the laws of our world. Grace is the breath of the Divine. Grace is a presence that descends on humanity and like all the Siddhis, it requires that we meet it halfway, which for us humans may seem a long way.*

*This is after all a perfected state in which everything about you and your life will be changed permanently. When true Grace descends it wipes out all your past karma in a flash. It also wipes out the Karma of all your ancestors and all their ancestors.*

***Through Grace, the Universe has but one single wish – for you to remember that you are Love and there is nothing in you but Love.***

May Grace Awaken us All to the Truth of our Being.

***Love and Blessings to All ~ S.M.***
