

CLEANING UP THE RADIATION CAUSED BY THE FAILURE AT FUKUSHIMA AND THE RELEASING OF THE ELEMENTALS TRAPPED AND SEPARATED FROM THEIR DIVINE PURITY - PART 1 - SERAPIS BEY - 12TH APRIL, 2017.

Beloved God I Am Presence, I call forth the Beloved Serapis Bey to share with me about the cleaning up of the radiation problems caused by the failure at Fukushima, as well as the releasing (Etherealization) for the Elementals, electrons, neutrons, and protons that are trapped and separated from Their Divine Purity. The present and continued outpouring of the radiation from the Fukushima site keeps surfacing, and I feel that something radical must be done to protect this radioactivity from happening and being disseminated around the world. I call you Dear Heart, because the 4th Ray has been impressed upon my mind constantly over the past few days! I did believe it would be Paul The Venetian who would speak, but at the last minute you have come forward. Please assist us to understand this situation more deeply, so we may prepare a Focused and Loving Intention to find a Resolution to this unbelievable catastrophe. Thank You and Bless You.

Dear Peter, I Am Serapis Bey, Chohan of the Fourth Ray of Harmony through Conflict. Indeed, I have come forward to speak with you due to the thoughts that you have been transmitting during the preparations of your 'New Visual' and this has sparked my interest. Up until then your thoughts regarding this situation were more generalized. Brother Paul's response would have given you His Individualized Expressions based upon your generalizations, and so now that your focus has reached a new level of intensity, enormity and insightfulness, I Have Come! I have much to share with you. This will help not only you, but those whom have now United within the Sun of Even Pressure Disciple Council. As well as those who shall read this in the future. There are many in the Higher Dimensions paying very close attention to this Divine Plan now, and this, as you all were told not so long ago, would set a new precedent for the Sun Council to begin a new phase of Ascension Programming!

I say Ascension Programming very specifically, for the Fourth Ray represents the White Flame of Purity, The Resurrection Flame, and that of Immaculate Concept. What better way to set this in motion than to utilize this opportunity whereby, through your own volitions, you choose to offer your Services for the Divine Resurrection, Purity and Immaculate Concept to those of the Elemental Kingdoms. And may I say, to begin with one of the most debated and apparently unsolvable dilemmas for human beings, when it comes to the spreading of radioactivity due to mankind's mis-creational activities around the world. Such manifestations are so far away from the Higher Realms of Creation, and the Freedom and Benevolence of All God Life!

So let Us Call in The Elohim of Purity and Astrea and begin to Burn the Ascension Flame of Purity in through and all around the mystery of the radiation outpourings, not only of Fukushima, but that of Chernobyl, 28 years ago. Let us include all the radioactive dumps all over the world in landfills, and those dumped at sea, both known and unknown. Let us speak of the nuclear weapons used in the past and those deployed around the world ready for use again now, inclusive of those arsenals of deadly explosive devices, that are being detonated every day somewhere within the world! How do you think the Elemental Kingdoms are coping with all of this? I AM going to tell you as we progress!

Purity, and the holding in one's mind, the Immaculate Concept, must become the Prime Focus of any Disciple who, as they move along the Paths of Ascension, and the Resurrecting of all that is **Good** within their Life Streams, and is also a prerequisite before any individual is able to Graduate in the Victory of the Ascension. All Teachings by the Ascended Masters are for one purpose only; to help Disciples to Purify and Harmonize with their Own I Am Presence Consciousness, The Christ Consciousness within themselves first. This will quicken the Ascension to **Become** the I AM Presence. This Principle is highly accelerated when one uses these Universal Laws outside of themselves as part of their own personal, and Impersonal unfurling. Provided the Resonance of such Souls are High enough

to Hold the Light required for such White Fire Light channelling for these sorts of Activities. Beloved Lady Nada spoke very clearly about this very subject within the EGA Discourses.

So, when We Hear of Disciples, through '*Their Own*' volitions and initiations doing such things, We Come Forth, make Ourselves Known and offer Our Guidance and Service to you, just as Beloved Djwhal Khul and many more have done and will do so! We Come to Over Light and expedite this authentic, bona fide and trustworthy Love in Action. Especially when the Disciples are much more focused upon those things outside of themselves, whereby they secure and assure their Energies to a genuine task, in advance of themselves.

But you see Dear Ones, this all goes hand in hand, for one cannot give, that which they are not. So to give in this way, to Pray and Advocate Purity through Release, Love through Compassion and Wisdom in Resurrection of others back to the Godhead, Our Hearts Rejoice. And with this, you automatically Magnetize unto yourselves Divine Consciousness in Life Forms, In All Dimensions and All Willing to Give Love, Power and Wisdom of Divine Consciousness, Light and Life to you! The only resistances in the Receipt of such Glory, Peace and Joy, is one's openness to receive, and beliefs in such Truth!

Such activities by Dear Human Souls, always lead to Great Celebrations, where We in the Higher Realms Universally Sing, Dance and Pay Tribute to such openings of awareness. All Those who Hear your Clarion Calls for Assistance, Come, Come, They Come! If you only had the '*Eyes To See*' Dear One's, these Gatherings would astound you and would indeed elevate you to New Heights of Knowing! The Heavenly Angels Come in Their millions, indeed billions, to join in Bestowing Their Songs of Praise, Of Honour and to the Glory of God through Their Heavenly Hallowed Choirs. Is it any wonder, that the Pressures of the 4th Ray, that you have been tapping into, has produced your '*New Visual*' is based around Heavenly Choirs and Songs to the Glory of God?

The Fourth Sphere is where the Holy Christ Selves of mankind abide, until such time as they are able to take the outer self in the out picturing of the Christ into the outer world of mankind. The Fourth Ray becomes the '*bridge*' between the Inner Realms of Perfection and the Outer Manifestation of the Divine Plan in the world of form. Is not the Elemental Grace Alliance Divine Plan about '*Building Bridges*' between these Realms among others?

The Beloved Elohim of Purity expresses, particularly, through this Ray and holds the Immaculate Concept for the Earth, humanity and all sentient Life Streams including and especially the Elementals, Devas and Angelic Host Kingdoms. For without them, nothing else would exist, and Earth would be no longer! The Mighty Beloved Archangel Gabriel draws the Resurrection Flame through this 4th Ray, and in the outer world of form, those who belong to this Ray are usually very artistic and have talents directed toward the activities of music, dancing, theatre, painting, graphic design, sculpture and architecture. Divine Creativity is the Key here!

So Dear One, are you beginning to see why The Fourth Ray has been felt by you in this Precious Endeavour? Indeed!

Let Us continue!

Very little is known, comprehended or realized within your world of human consciousness about The Immaculate Concept. The Immaculate Concept is that Divine Activity of Holding within one's thoughts and feelings, the Divine Pattern, the Divine Blueprint, not only of yourselves, but for each other, and every sentient life being you come into contact with.

There is a Glorious and Beautiful Divine Pattern for every Expression of Life. When that is Held in the Higher Consciousness, instead of the outer appearance, which temporarily cloaks that particular form, it assists in bringing into Divine Manifestation in the outer realms, those expressions of Mother Father God. This enables Divine Consciousness to envelop those Dear Ones for a Whole and Complete Transformation, Transmutation and indeed Transfiguration.

This was exactly how Beloved Jesus Healed those He Touched and Prayed for! He Held His Divine Consciousness to the Divine Image of those He saw that needed help and so with His Divine Obligation, He was led to Restored them back to the Divine Blueprint of Their Immaculate Concept, in accordance with God's Will to have All Life, Perfect in His/Her Image. Now the same Obligations are becoming your Responsibilities! That is why you are being drawn to people, situations and circumstances that are out of alignment and balance with Divine Consciousness and God Good Life!

The Immaculate Concept is simply then the '*Magnifying The Good And Divine God Blueprints*' everywhere your attention is drawn, just as you are going to do with the Fukushima outbreak and the human thought form decay that produces the radioactivity that taints, maims and potentially kills all it touches. Thus your Focused Intentions held in this way will minimize the appearances of imperfection, and help to bring more Love and Light to all you see and touch. And there are no exceptions, from the most minute penta-quark to an entire Solar System.

As Jesus The Christ tells you in the Christ Letters, **EVERYTHING** is Consciousness and everything responds to Conscious Thought Form Projections; be them positive or negative, Divine or human, Light or dark. The results are only determined by the Levels of Vibrational Frequencies of the transmitter, either individually or as an average for a group.

Now that I have set the scene for a clearer understanding, as it is getting late for you there, tomorrow, if you agree Dear Soul, let Me open to the issues around the Fukushima failure and the present day concerns, worries and dilemmas of being unable to stop the advancements of such flotillas of deadly radioactive materials around the world.

But just before you go, Mighty Purity is here and would like to say a few words.

The Beloved Mighty Purity Speaks;

Dear Souls, We Come, Astrea and I, because We are Essentially, Centrally, Primarily and Intimately a Part of this Elemental Grace Alliance Divine Plan and are aware of all that transpires within it! But this only just scratches the surface of Our Participation within the Overall Creation of this Entire Universe. You know Who We Are, and Our United Cohesiveness in Love with the Other Six Elohim, when it comes to The Seven Steps of Precipitation.

As Guardians, Sentinels and Protectors of All God Life, We Are The Immaculate Concept of this Entire Universe. We Are here today to Share Ourselves with you that which encompasses this present Divine Plan.

The Beloved Chohan Serapis Bey has outlined much in His Address and so there is no need to repeat what has already been shared. However, for what is developing here by the Dear Ones of this Elemental Grace Alliance, We wish to simply place this information into your focus. This will amplify and magnify your understanding in what you are about to embrace within your attempt to clean up all radioactivity around the world, and the complete shut down of the Fukushima Reactor. Nothing like this, in this way, has *ever* been attempted before by any human beings anywhere within this Universe. A *radical vision* indeed and one that We shall most definitely offer Our Services to!

This is what We wish for you to ponder over, during the time frame between now and when we return together to continue this Discourse.

Within EVERY Electron, The Purity of God's Divine Pattern is Present, untainted and Complete within Its Design and Function. The only things that prevent them from functioning directly from within this Blueprint, are the shadows of all negative and fear based projected consciousness that surrounds Them. These projections do not contaminate the Electrons themselves, but simply places them within an encasement of outer physical, mental, emotional and spiritual barriers, that is an impregnable barrier for Divine Manifestation to occur. That is, without the Divine Intervention by human beings themselves. Those who represent the very thought forms that created these imbalances in the first place.

We could do this in a nano second, but this is not possible under the Laws, Covenants and Decrees and Charters of Life upon Earth within God's Divine overall Plan here. This is Universal Law within this Earth, Human Evolutionary Program. It is like your own Three-Fold Flame, encased by physical bodies created out of your projected thought forms.

So with this human body example, the Electrons that make up your physicality are encased with such shadows, which are then visually manifested as illness, disease, depression, incorrect thoughts and beliefs, disabilities, limitations within body, mind, emotion and spirit, in every level of creation, therein possible. So to address the cleansing and releasing of Electrons is the VITAL ACTION for all such shadows to be removed, allowing the Electrons to act and function exactly in Accordance to their Divine Patterns once again.

In short, all these discordant appearances are but the 'cloaking' of the Electrons by the ignorance and arrogance of human beliefs and ill conceived programmings over eons of time.

So please look at it from this perspective. I Am/ We Are, the Perfection of All Electrons in All Creations within this Universe, both Divine and man made. The Living God of Each Electron is now Calling for Release from their imposed Exiles from Universal Love, that humanity has locked away and incarcerated them from. We now wish, **through you**, to Expand Our Purity, Our Divine Immaculate Concept from with each and every cell and atom of all life here upon the planet.

Through your New Activations and Invocations, We wish to Speak through each of you DIRECTLY to those Parts of Ourselves, The Electrons, which have come from the Universal First Cause, to call upon Them to increase there Magnetic Attraction back to Their Divine Connection with Source by increasing their Electro-Magnetic impulse spins. Presently the rotational speeds of Electrons have slowed down due to such shadow enclosures. Through the penetration of human High Resonant Decrees and Invocations, these rotational spins will be automatically increased.

With your help, for it must be done through human consciousness, I/We, The White Fire Light of The Divine Flame of Purity through Its Immaculate Concept; and as the Electrons Themselves, can answer your calls. These MUST BE Obeyed according to Universal Law. WE can then Respond immediately to increase the Magnetic Pull of your Demands and Commands from the Immortal Core of Our Beingness and speed up the revolutions of The Electrons. This will automatically shatter, dissolve, annihilate, disintegrate, deflect, repel and eradicate all shadow crustaceans, covers, barriers, entrapments, incarcerations and encasements.

This in turn will send these rejected lower vibrational thought form manifestations, back to Beloved Helios and Vesta, your Solar Sun, for Etherealization and Re-Polarization. By doing this, the Electrons shall be able to be Magnetically Drawn to once again Divinely Create the New Erthe Physical

Manifestations, as was always Their Divine Purpose. We Know that this will soon happen upon Earth, because We are the One's Responsible for Holding this Immaculate Concept in Our Hearts and Minds for all of Humanity and the Earth. This will not happen over night, but the potentials HAVE arrived, and this is how they will be achieved by humanity!!!

One last thing before I close to remember! Just like the intention to cleanup the Fukushima radioactivity, the exact same procedure can be used to clean up your own four lower bodies and the rest of human mis-creations around the world. Your Work is just beginning Dear Souls! But you are not alone in this! You must KNOW this without any shadows of doubt, to be successful in these endeavours.

On behalf of Chohan Serapis Bey and Ourselves, We bid you a deep sleep this night and a Joyful Rising!

We Are Serapis Bey, and The Elohim Purity and Astrea in Your Service.
