

'Ancestral Reverence'

Gene Key 32

Moving from *Failure* to *Preservation* to *Veneration*

The Shadow Human/Ego) level of this genetic code, is Failure. One of the greatest fears for humanity is found in this shadow – the fear of Failure. This fear has a deep biological root since it is built into your very DNA. Your individual fear of Failure is rooted in the collective fear of Failure to survive as a species. Our collective fear of survival is almost entirely projected onto the amount of money we have. The fear of Failure as a feeling inside your physical body is intimately linked with money. The 32nd Shadow drives our modern society and keeps humans operating at a low level of frequency by means of this fear. Although the fear of this Shadow has its roots deep within the human immune system, it is the mind that reacts to it and feeds of it. If you are not aware of the power of your mind, then your mind will run your life which means fear will run your life. To raise your consciousness to the Gift level does not mean that fear will disappear, but at that frequency you will no longer react to it.

Repressive Response: Fundamental At this level there is an extreme form of conservatism - a fearful nature that becomes extremely tight and rigid. There is no desire to connect with the wider world.

Reactive Response: Disjointed This is a state based on anger – the anger that there is nothing to support you but yourself. People who live disjointed lives have cut themselves off from Source, with no real rhythm or purpose.

The Gift (Soul) level of this genetic code is Preservation The 32 Gift is not about self-preservation but is about the Preservation of Life. The secret of this Gift is the instinctive ability to balance restraint (what to keep alive) and risk (what to change). The 32nd Gift has the ability to assess the past, weeding out weaknesses and building upon strengths. As we move into the 32nd Gift as a species, we will once again return to Nature. Nature represents our roots and we, humanity, are the vibrant young shoot with its dreams of transcendence. In listening to the great wisdom contained within our ancestral past we have an anchor on which to graft our modern technological awareness. This fusion can bring true transcendence. If we cannot overcome our fear of personal failure and selfishness we, humanity are all at risk. It is through the manifestation of the Gift of the 32nd Gene that our Earth will be defended and Preserved.

The Siddhi (Source/Oneness) level of this genetic code is Veneration Each of the 64 Gene Keys is essentially a process in which fear or anger is progressively transformed by being put to use in the service of the totality. At a certain point, however the ancient genetic fears can be transcended altogether. The 32nd Siddhi is the state of Veneration. It is all that remains when fear has burned away. Veneration is the state that occurs when you see and know your place within the great Living chain of Life. Veneration is about being on a spiral ladder. You stand on the shoulders of those who have come before you and you allow those who will go beyond you to stand upon your shoulders in turn. What you venerate is the chain itself as well as all the beings above and below you. You realise that even the humblest insect is allowing you to stand upon the shoulders of its consciousness. This gives rise to a fathomless feeling of reverence for all sentient life. Veneration is rooted in respect, reverence and gratitude for all aspects and forms of the One consciousness behind creation. The more you contemplate the 32nd Siddhi the more Veneration and reverence you will inevitably feel for all Life – you will begin to smell the perfume of Divine Consciousness in all forms of Life.

Side Note: This Gene Key is one of two (28,32) in the Codon Ring known as the “The Ring of Illusion”. There are 21 Codon Rings within the DNA. These rings are chemical chains that relay biological information between each other in fractal manner. The body acts as a bio computer organizing multiple levels of information. 20 amino acids are combined to create the chemistry needed to respond to the environment.
