

# Cosmic Overview

June Full Moon and Summer Solstice

*'As the seed holds within itself the pattern of the flower, so does the Sacred Heart of every man, woman and child hold within themselves the Pattern of their Divinity.'*

Pallas Athena – Part 3 Reality Check

# 'I AM' THE LIGHT OF INTERPLAY & RELATIONSHIP

As mentioned in the previous New Moon review, if Aries links to the Essential Spark of Life and Taurus to the Magnetization of that Spark into Form, then Gemini speaks of the ability for that Form to develop Individuality – which is where the 'Fall' from the Garden of Eden began over eons of years ago, but to which we are now returning as we unite with our I AM Presence/Double/Etheric Light Body, bringing Heaven to Earth.

For when the physical form, the Soul and Spirit are aligned then we have the ability to communicate with the whole of Creation – this reality is underpinning the symbol for planet Mercury which 'rules' the Gemini Constellation - the Cross of Matter being shown as the foundation stone for the Circle of Spirit to be held and anchored through the magnetization of the half circle of the Soul.

This Truth has been passed down through the Ages - the Ancient Greeks depicted Mercury as the Winged Messenger holding the Caduceus – the wings on the feet and head showing the chakra points which are activated by Divine Will, when the Life Force is harmonized through the Ida and Pingala channels, flowing directly through the Alta Major points, via the Carotid Arteries opening us up to levels of Consciousness previously dormant.

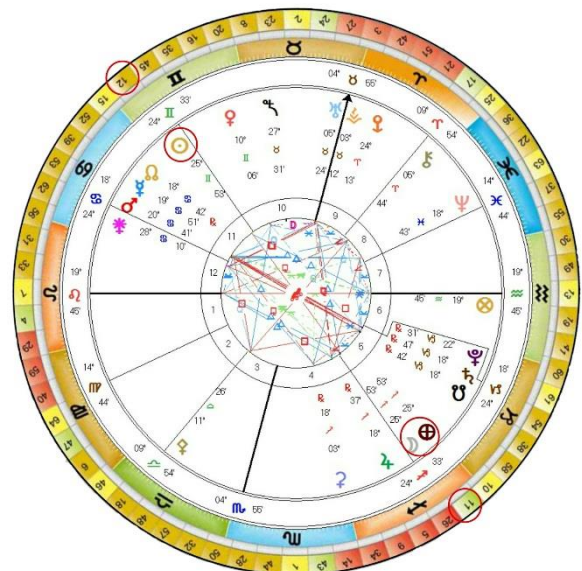

So how does the Full Moon and the Solstice, which is taking place a few days later, continue to unfold this theme of physical integration with Divine Spiritual resonance and awareness. We are passing through a time of great change and great opportunity – a time that is being over lighted and orchestrated by the planetary bodies as they flow through the Constellations, Light, Rays and Consciousness permeating that 'space' which then interpenetrates and irradiates every atom of our being, nanosecond by nanosecond.

At the time of the Full Moon the Sun is at 25° Gemini 53 with the Moon and Earth, in opposition, on 25° Sagittarius 53 stimulating **GK 12** and **GK 11** known as **A Pure Heart** and the **Light of Eden**.

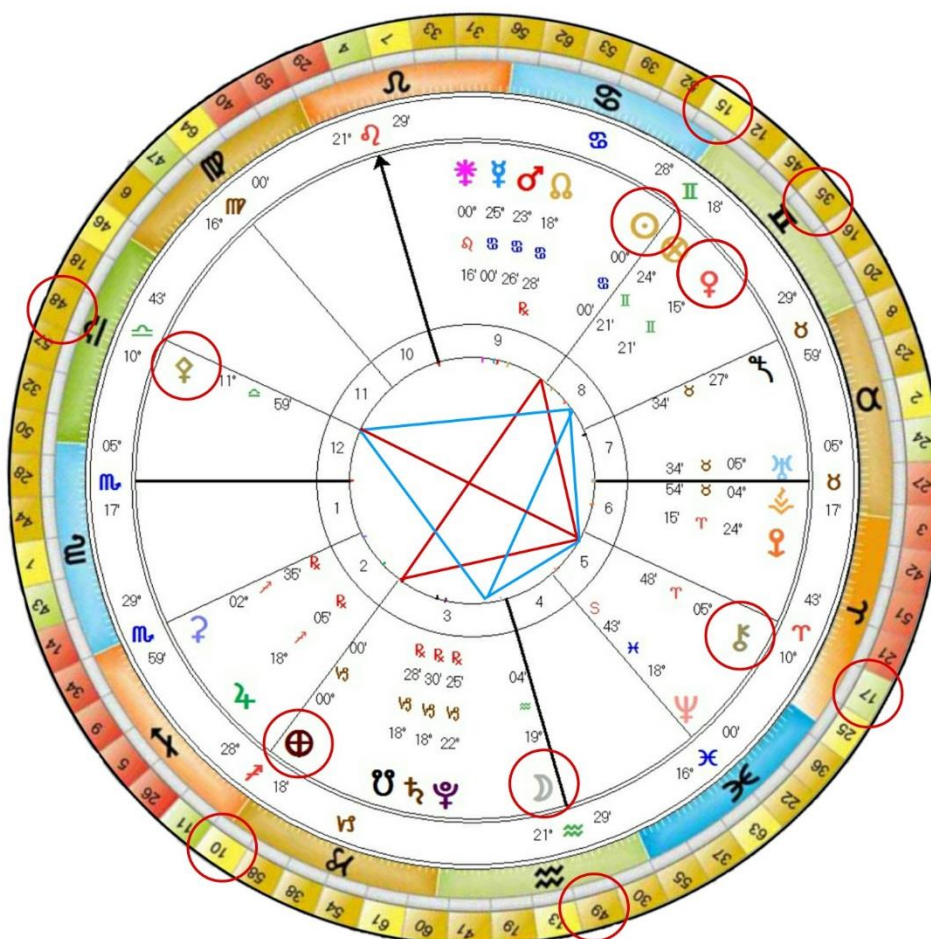

*'The human yearning for true Love is, in reality, a lower frequency of a permanent state existing at a higher level of Consciousness. This state is essentially your pure Nature. Only the Higher Mind, which is another expression for your Heart, can begin to understand true Purity.... You might say that Purity is when the Divine falls in Love with You. Your behaviour, your thoughts your feelings, the very air you breathe must resonate to one purpose – falling in Love with the Beloved. The Beloved is the Essence of your true Nature. The Being who has passed through the Abyss and entered the sphere of the 12th Siddhi becomes once again like a child.'*

**'For the Being that attains the 11th Siddhi, Light is everything. The pure Light of the 11th Siddhi has nothing to do with good and evil. It represents the transcendence of duality. The 11th Gene Key geometrically relates to the Galactic Centre. It is through this Gene Key that the Galactic Light emerges that will trigger our DNA to release its Inner Light and catalyse the Siddhic states in many people – exponentially increasing the frequency field of the whole of Humanity.'**

Full Moon 17<sup>th</sup> June 2019 09:30 BST London UK

# CHART FOR THE SOLSTICE

This influx of Galactic Light leads up to the Solstice which is on the 21<sup>st</sup> of June when the Sun moves into 0° Cancer 00 at 16.55 BST London UK, which is the official start of Summer in the Northern Hemisphere, when the Sun reaches its maximum height in the sky.

The Sun is on **GK 15** known as **The Eternally Flowering Spring** moving from **Dullness** to **Magnetism** to **Floresence**.

***'The Gift of Magnetism makes a person physically glow with Life Force - it is a Gift filled with enthusiasm and openness and Love. Trusting the natural ebb and flow of life's currents, these people live closely with the Earth's natural rhythm and experience the wisdom and clarity of slowing down.***

***There is a subtle shift in attitude that unlocks the hidden magnetic force in your DNA. Harnessing the power of the natural world and magnetizing resource you begin to unlock the power in your aura to transmit and receive information between different Life Forms***

**Florescence is the ultimate flowering of your Higher Self.** It is a state that occurs to humans sporadically, no one can predict if or when it will occur to a particular person.

**However, when it does arise that person is surrounded by Light, magic and a tangibly magnetic aura.** As the zenith of human magnetism, Florescence manifests like a Supernova through the human aura and once begun it keeps expanding and expanding into deeper and deeper dimensions. **Florescence is Grace.** This experience of Grace ends all seeking.

When you come into perfect alignment with Gaia, then, in the words of Christ, you mystically **“Inherit the Earth”**.

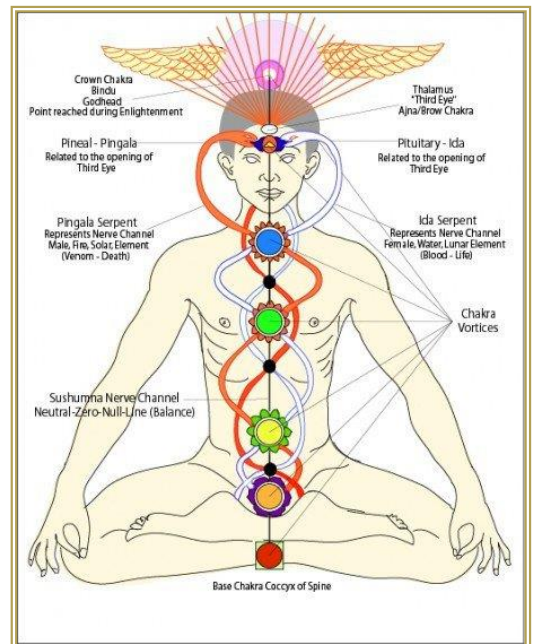

The Earth is in opposition to the Sun at 0° Capricorn 00’ on **GK 10** known as **Being at Ease**, moving from **Self-Obsession** to **Naturalness** to **Being**.

At the Gift level there is a huge releasing of energy through your being out into your life – an intense creativity and playfulness. **The Gift of Naturalness cannot be practiced and copied it can only emerge through a rising sense of inner freedom and spaciousness.**

Naturalness unfolds through stages and the final flowering of your inner Being manifests as a challenge to the current norm, since your true nature is always found at the cutting edge of evolution. The idea whatever it may be, represents the true beauty within the individual finding expression in the world.

Through the 10th Siddhi a great lightness is born and a great humour concerning Life itself. Along with its programming partner, the 15th Siddhi of Florescence it inspires one of the great metaphysical paradoxes of all time. **These Siddhis correspond to the Buddhist states of Being and Becoming – the Arhat and the Bodhisattiva Consciousness.**

**For the person who has entered the mystery of the 10<sup>th</sup> Siddhi the two poles of Being and Becoming are One.** They rest in the true Nature of Being, whilst also witnessing the flow of form becoming more and more complex through evolution.

Both the Sun and Earth, at the time of the Solstice, are making a 90° angle to Chiron. The transits of Chiron, as shared before, link the physical and the metaphysical – Chiron allows more Light to penetrate into the atomic cellular structure – this occurs as we face, release and heal ancestral wounds. Chiron is known as **The Wounded Healer**, but a more apt and truer title would be **The Initiator**. Chiron links to Christ Consciousness to an elevated state of awareness which is Selfless.

Chiron is at 5° Aries 48 on **GK 17** known as **The Eye** moving from **Opinion** to **Far-sightedness** to **Omniscience**. Looking at the above picture you will see how the Ida and Pingala, the two poles, meet at the Ajna Centre, at the pineal gland, the physical organ of the Third Eye, where a unification of these two channels is brought into a harmonious synthesis via the integration of the higher levels of this 17<sup>th</sup> Gene Key, which underpins the foundation of Initiation and Higher Consciousness.

***'Freed from the Shadow frequencies of mass consciousness the 17th Gift has the ability to see higher dimensions and realities - looking ahead to the future and linking one phase of evolution to another.***

***It is working with the Gift frequency that the process known as the opening of the Third Eye begins. This Gift brings access to a whole new inner language that circumvents the need for one sided, dualistic expression.***

***Thus, Far-Sightedness can be said to arise directly out of the Heart rather than from the mind.***

***The 17th Siddhi of Omniscience, corresponds to the open Third Eye - seeing and the seen are one. A Single Eye through which consciousness pours and where past present and future are a single eternal screen of consciousness. These are the true seers and oracles.***

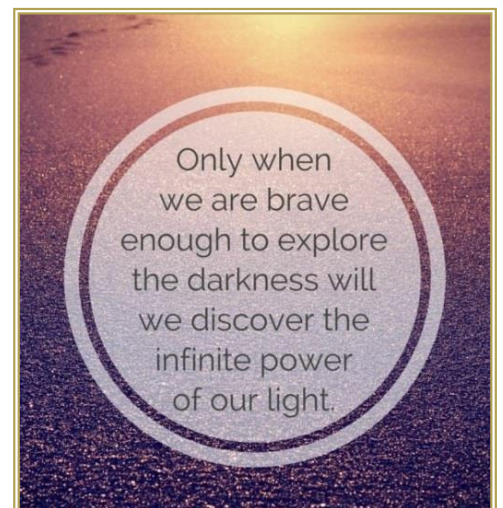

Looking at the Chart you will see that this planetary aspect of the Sun Earth and Chiron (red lines) is further highlighted by a Kite formation (blue lines) which has Pallas Athena making a 120° aspect to both Venus and to the Moon, all flowing down to Chiron on Gene Key 17 – so there is a heightened focus upon this potential at this Solstice.

Pallas Athene oversees the 12<sup>th</sup> Ray of the Golden Opalescent Light of the Great Central Sun – a combination of all the Rays of White Light – a Golden Luminosity anchoring the resonance of Christ Consciousness. The 12<sup>th</sup> Ray of Light is an extension of the Office of the Christ and anchors the Pure Love Essence of the Creator into all Rays of Light throughout the Creator's Universe

Pallas Athena, at this time, is on **GK 48 'The Wonder of Uncertainty'** lifting humanity from out of the Shadow of **Inadequacy** to **Resourcefulness** to ultimate **Wisdom**

***'Instead of hiding from the darkness inside you it is as though you finally lower a bucket down the well and then pull it up to see what it contains. What you discover is a wonderful surprise – the well has all manner of solutions to all manner of challenges – you will be amazed that so much Light can emerge from such a dark place. This is the essence of the Gift of Resourcefulness.***

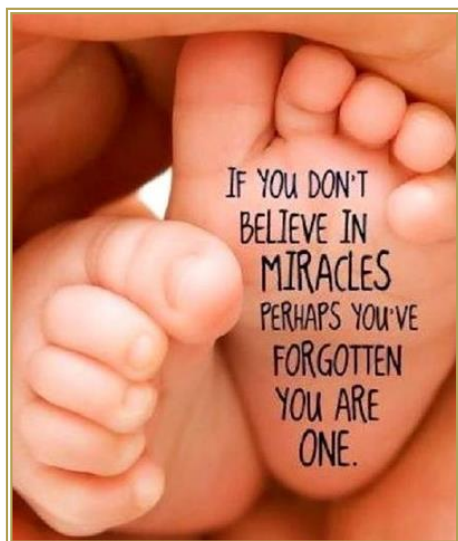

***As you begin to trust life and your place within the greater whole, your natural gifts spontaneously emerge. All of your inner talents and resources are ultimately designed with a built-in programming agenda – to offer service to the whole. You begin to realise that you are capable of far more than you ever dreamed possible.***

***Wisdom has been revered and sought by all cultures since the beginning of time. Most see Wisdom as some inner knowledge that allows the individual to see beyond the confines of normal awareness. However, the 48th Siddhi opens up the void inside you and you enter into a primal state of not knowing – for Wisdom is feminine in essence deep and unfathomable.***

***Everything about Wisdom is about being unsafe and unsecure. There is a great difference between being insecure and unsecure – in insecurity we are looking for safety, for answers - to be unsecured means to be released from fear altogether. It means to have stepped through the Group Consciousness of fear and to be more secure than can possibly be imagined. No fear of death, no fear of life'***

Venus, which is the planetary energy over lighting Gemini through the 5<sup>th</sup> Ray, when the personality and Soul are aligned, is on Gene Key 35, which is where the Sun and Moon were at the time of the New Moon on June 3<sup>rd</sup> - reinforcing this potential which is known as **Wormholes and Miracles** moving from **Hunger** to **Adventure** to **Boundlessness**

*When progress turns inward and one's Hunger for Adventure is no longer outside, but is focused within the nature of Being, the 35 Gift begins to flower. This is where the Human Spirit breaks free from the limitations of mind. **The 35th Gene Key stands alone within the codon ring known as Miracles.***

***The 35th Gift is the only place within all human DNA, where human beings have a choice in how their reality is constructed.***

*There is a hidden wormhole in the DNA - a shortcut to the Divine. **This is where pure unconditional Love can break all the Laws of the Cosmos, including all genetic laws.** It is allowing human beings to take charge of their own evolution and outwit the global genetic programme. With Love, serotonin production is increased and stabilised within the chemistry of the human brain.*

***Love has nothing to do with another separate person, but is the connective tissue underlying all Creation.** The 35th Siddhi invites human beings to expand their consciousness so far that they leave the sphere of evolution altogether.*

*Boundlessness is Consciousness. **When the Siddhi of Boundlessness enters the world, it allows consciousness to penetrate right into the heart of matter, which bends the Laws of Matter.'***

And the Moon, which makes up the third aspect of this triangle is on **GK 49 Changing the World from the Inside** from **Reaction** to **Revolution** to **Rebirth**

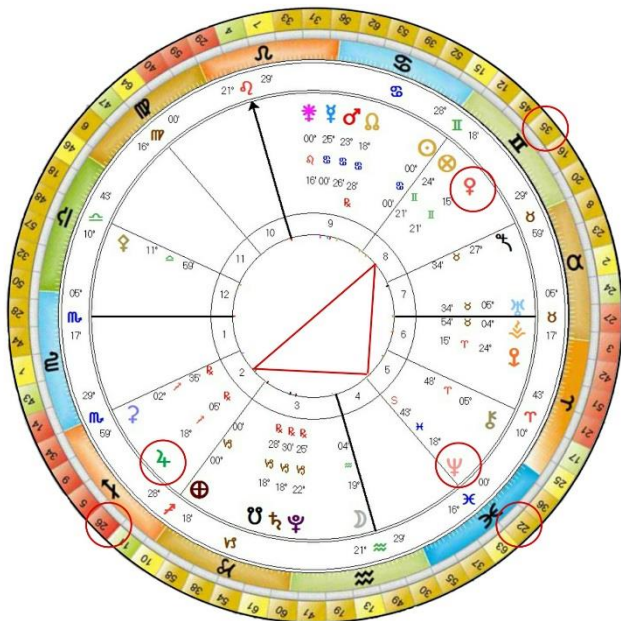

*'There is a difference between reactionaries and true revolutionaries. Reactionaries base their reforms on their anger and fear, whilst the agents of the 49th Gift are not victim to their old emotional prejudices. They do not provoke further Reaction, but seek to resolve conflicts and at the same time **implement radical changes and ideas based upon a grand vision for the future - a vision of deep goodwill towards all creatures.***

***The 49th Siddhi represents a huge leap in consciousness because it engenders a state of mystical divorce.** The 49th Siddhi conceals an archetype that appears to be a part of all human evolution – that of Rebirth.*

***Once in a while along the evolutionary chain a new species is born out of the old species.** Like the mythical phoenix it has nothing in common with its parent. **It rises up out of the genetic material of the old and takes a whole new direction'***

And that is where humanity is right now - there is an intent and focus at this time which is undeniable as the planets mark out our potential and there is just one other aspect, I would like to share, which gives and added dimension to all that is being offered to us at this Solstice.

Looking at the chart again you will see that at the time of the Solstice Jupiter will be opposite to Venus and Neptune will be making a 90° aspect to both Jupiter and Venus.

Jupiter in Sagittarius brings enthusiasm, expansion, a sense of optimism and joy to all that it touches – Venus links to the emotional body to the feeling side of life and Neptune, which is the higher octave of Venus, links to Unconditional Love, Selflessness and Compassion.

Jupiter in Sagittarius, Venus in Gemini and Neptune in Pisces are each embodying and disseminating the 2<sup>nd</sup> Ray of Love and Wisdom - irradiating this Divine Love throughout humanity - an expansion of Consciousness which assists in the creation of serotonin within the physical form and the expansion of Light within the cells.

It is in ‘lightening up’ that we become Enlightened, which is reflected by Jupiter at this time on **GK 26** assisting us to evolve through **Pride** to **Artfulness** to **Invisibility**.

‘Deep within the substructure of your physical body lies a set of four chemical codes whose role is to determine **how your body captures, stores and transmutes light waves into energy**. This role is housed within Gene Keys 5, 9, 11 and 26 - **The Codon Ring of Light**. There is a hidden mutation waiting to occur within your DNA - a magical process that occurs through the 26th Siddhi.

**As you open your Heart to life more and more, your thymus gland triggers a vibration of such refined intensity that it spontaneously ignites the higher functioning of the pineal gland. The pineal gland opens a chemical pathway within your brain that allows you to access Cosmic Consciousness.**

This 26th Siddhi dissolves all sense of individual will. Everything in the Cosmos is driven by a single turbine and surrender to this impulse renders the individual ego Invisible – not just your own ego but everyone else’s egos as well.

**To dance with the 26th Siddhi is to let go of all agendas – these people will use whatever faculties they possess to transmit their sense of Love for Creation – their sole purpose is Divine fun – God at play within and through them.**

How beautifully this Gene Key is reflected in the words:

**‘Your emotional body was created by God for a definite purpose. The emotional body was designed to emulate the Feelings of God and to Expand the Qualities of the God-Nature in whatever sphere the individual consciousness is functioning’ Pallas Athene – Discourse 3**

The Emotional Body as an expression of God is echoed by Neptune, passing through Gene Key 22 at this moment in time, bringing the resonance of Divine Grace to this Solstice for us to embody – a reflection of the Quality of God.

It was at the end of March 2019 that Neptune began transmitting this Light frequency of the 22<sup>nd</sup> Gene Key out through the Solar System – Neptune will briefly leave this point in September 2019, but will then return to Gene Key 22 at the end of January 2020 and will remain in this region of the sky until 7<sup>th</sup> March 2022 – so we are all being given this Divine Blessing to encourage us to remember who we are.

***'Grace is your true nature. It is your inheritance. It is the Soul of the World.***

*It is also a state that is beyond the laws of our world. **Grace is the breath of the Divine.** Grace is a presence that descends on humanity and like all the Siddhis, it requires that we meet it halfway, which for us humans may seem a long way.*

*This is after all a perfected state in which everything about you and your life will be changed permanently.*

***When true Grace descends it wipes out all your past karma in a flash.*** *It also wipes out the Karma of all your ancestors and all their ancestors. If Grace touches you you no longer have your own destiny but become a musical instrument played by the Cosmos. **With Grace all human emotion is instantly transformed into Love.***

At this Solstice time, may the Qualities of Purity, Light, Grace and Wisdom be embodied within our Being, creating a Rebirth for All in Ease and Joy.

***All Love and Blessings***

---

---

Blessed Souls, there is but ONE POWER by which you can accomplish anything. That is the Power of The Prime Creator that flows through your own individualized Presence and gives the Life to your feeling world.

---

---

***12<sup>th</sup> June 2019***
