

PART 4 - CHRIST TRUE VIRGIN - COSMIC CLOCK REUCHE INITIATION - LISA RENEE, 19TH FEBRUARY 2022

Currently there are many changes, alterations and upgrades that are happening to the Cosmic Clock functions, in which there are many untold amounts of universes, manifested worlds and consciousness fields that are directly administered to within its core creation system. As we learn more about the Emerald Founder families, we have the immense pleasure and joy of observing the reunification made with their hierogamic partners after a vastly long separation. As a result, we learn more about the functions of the Cosmic Christos Diamond Sun body and how that eternal solar template is designed to administer to the natural laws and mechanics of Creation in the Universe.

The Reunion of some of our Cosmic Christos Family Members in the Hierogamic Template of Golden Aeonesis is resetting the event horizons and timelines that were being held in place as the twelve Dark Aeons. This *'field alteration'* is returning the Planetary Consciousness access all the way back through multiple time matrices that reorient our particular location in this time and space, to the coordinates recorded as density 1-2, quadrant 4, corridor 4, and spectra 3. Then finally going all the way back to the 1st God World Creation by witnessing a sequence of opening interdimensional portals that begin to correct the Universal Time Matrix alignment with the original source fields of the Cosmic Clock. During this cycle of Universal Ascension we are being reconnected through each of the stages that take us through the many layers of nested time matrices, that lead us through the Stairway to Heaven. To be on the ascending path that takes us home through the Stairway to Heaven, here in this density, we must be placed on the evolutionary path of the Eucharist. This pathway reconnects us with the Cosmic Emerald Heart flame of the Cosmic God Matrix or 1st God World Creation that is the ultimate threefold flame God source of our particular manifested world. The Stairway to Heaven is incredibly complex and contains the God source threefold flames of many other parallel worlds in which our Universal Time Matrix is ultimately interconnected.

The Cosmic Clock from the 1st God world creation is synchronizing with this Universal Time Matrix in order to begin the next stage of planetary ascension that awakens the Eucharistic spiritual body flame codes within the angelic human DNA. Thus, the Cosmic Clock Reuche Initiation is also considered the full spectrum planetary Eucharistic activation because it opens and activates a series of density locks and time codes being directed as the result of the Return of the Emerald Order. Organic angelic human DNA is arranged in the same instruction sets and blueprints that directly correspond to the complex layers of the macrocosmic architecture of creation, which extends into nested holographic matrices that make up the planetary, galactic, universal and cosmic levels. As a process of planetary, solar and Universal Ascension, we are returning back through the central cores of multiple creation matrices and solar bodies that are purposed to hold the event horizons made up of multiple timelines, in order to return the ascending consciousness back to the 1st God World Creation that governs all domains which have been down stepped and sourced within our system.

The magnitude of this Cosmic Emerald Order ascension event to awaken the planetary Eucharist is hard for our minds to fathom. As we begin to imagine the return of our Cosmic Mother and Father to this world, and in the process of remembering, connecting the microcosm of personal experiences with these actual macrocosm events to realize how incredibly massive the Universal Ascension event is in its scale. Although it has been an incredibly difficult spiritual journey, angelic humans are participating in a rare and wondrous Cosmic event that has greatly exceeded previous consciousness evolution potentials beyond any standard ascension cycle.

Cosmic Emerald Sun Awakening, Eucharist

On February 22, 2022, our Planetary System begins the Cosmic Clock Reuche Initiation of the central seed of the higher heart, or the Cosmic Emerald Sun Awakening into the path of the Eucharist. The Universal Time Matrix begins to open the density locks leading directly into the higher Inner God World realms which begins to flood Cosmic Mother's aquamarine blue ray source of zero-point flames from within the diamond heart of the Cosmic Clock shield network. This planetary initiation is essentially the 1st God World Creation announcing to the Universal inhabitants that the cycle for the Return of the Emerald Order Founders is commencing through the embodiment of the authentic Emerald Order identities that are the original Christos Founders of this system. These are not Emerald Order trained representatives; these are the actual Emerald Order and Amethyst Order identities that created our time matrix taking some form of embodiment in the Cosmic Clock of the Aeons and within the planetary grid network. This activation poses potentially lethal consequences to those artificial machinery systems of complex AI networks that have used cloned Emerald-Amethyst Order identities for the purpose of gaining control over the planetary system and the intended consciousness enslavement of angelic humanity.

The Cosmic Mother's White Diamond Flame core is a white tesseract that is found in the Sun-Star shields protected by the White Diamond Elohei and in the center of the aquamarine plasma sound fields, which are emanating from the Cosmic Amoraea shield currents. The Cosmic Amoraea Shield is the Divine Holy Spirit of Mother and Christ Child, made up of the combined flows of Six Emerald Crystal Heart centers existing within each of the layers of the nested time matrices that comprise the pathway through the Stairway to Heaven. The Six Emerald Crystal Heart Pillars further source from the original twelve Reuche pillars from the God Worlds that generate the Emerald Order Tree of Life. The Emerald Tree of Life merges into the Cosmic Clock Templar within the newly birthed Emerald Suns, sourced from the core heart spirals of Aquamarine and Emerald Rays flowing from the 1st God World Creation.

The opening of the organic currents sourcing from the Cosmic Amoraea Shield are the greater aquamarine blue heart flames of the Divine Holy Spirit that are intended to merge with the lesser blue flames ignited within the emerald crystal heart of angelic humanity. Cosmic Mother breathes the holy spirit blue flames to merge in the crystal hearts of her divine children that are ready to embody their Inner Christ. These blue flame currents flow into the

corresponding instruction set templates which further alter and adjust the macrocosmic clock shields that make up the coordinate locations of every angelic human Light Body, dimension, density, and harmonic universe. This event essentially will instigate large scale collapse of artificial timelines, artificial coordinate positions held by Fallen Angelic Timekeepers in the clock shield templates, by unwinding the reversal currents or anti-life Metatronic currents and resetting them back into natural alignment with the Cosmic Clock in the 1st God World Creation. As the unwinding of anti-life reversal currents transpires in the planetary Albion Light Body, it is similar to observing the clock hands of time begin to move in counter-clockwise spirals and see that many previous destructive timelines are rolling up and then disappearing into nothingness within the Cosmic Mother's Womb.

Cosmic Mother's Womb and God Seed

Through this massive aqua-emerald transmission sourcing from the Cosmic Womb of the Holy Divine Mother, she transmits the perfect proton and neutron consciousness units, which carries the God Seed of the Diamond Sun DNA template for her organic divine children seeded throughout the creation. The natural offspring and those refugee races who agree to regenerate their species DNA for organic ascension will receive the potentials of the Maharata blueprint of her sacred sound aqua plasmas in their activated 8D axatonal line, thymus gland, permanent seed of the higher heart and activate dormant hara centers.

This is akin to receiving the inhalation breath message from the Cosmic Divine Mother and through her call to her children recorded in the oceanic flows of the Blue Flame Maharata transmissions, she contracts the further outward expansion of the outer creation fields by pulling them in towards her Cosmic Emerald Heart. Cosmic Mother comes through the Universal Time Matrix Azura points held open by the recently reunited Aeonic Pairings of Kantarian Solar Dragons of the Founder Kandaray. Cosmic Mother locates our spiritual families matched to the angelic human template so that we are placed in her organic womb or protected void spaces within the creation fields. It is from within the void or holy sepulchre chamber that we enter, in order to alchemically transform our shadow parts back into the resurrected Solar Christ Children, so that we are placed in the correct coordinate positions aligned with the Cosmic Clock and can remember our true God Parents, in order to return back home into the God Worlds.

During the phase that began the return of the Solar Rishi into dimensionalization, the code of the violet sun began to lay the correctly aligned planetary infrastructure in order to begin to activate a series of Sceptre Codes. (See the September 2020 newsletter: The Amethyst Order and Violet Flame Holders). The Sceptre Codes hold the expressions from the 36th dimensional layers of the Amethyst Order which sequentially release the series of density locks and build horizontal shields that allow access into the Rah God World Creation from our coordinate position in the Universal Time Matrix. Sceptre Codes refer to the necessary activation of opening density locks for the next stage of shifting timelines for the planetary and biological ascension. Sceptre codes lay down the correct architecture for igniting the 12

Sceptre Pillars on the Cosmic Clock which reset the timelines held in lower creation matrices. This occurs when the Cosmic Clock aligns directly with the clock shields in the lower densities that form into the matter fields, and it shifts timelines to synchronize with the Cosmic Clock as God intends.

Opening the Density Locks, Immanuel and Yana Codes

The planetary activation occurring at this stage of the Ascension Cycle includes the systematic release of many sequences of density locks that had been previously blocking mass consciousness access into higher dimensional perception of organic ascending timelines. Many awakening people have been absolutely stumped to observe others around them not seeing what they are seeing happening in the outer world. The causality of blindness is not only sourcing from the mind control programming, but from these mind locks and density locks that have sealed off their consciousness body in ways that lock them into a specific position in time. From that position in the field, which is generally inverted to perceive things happening backwards in time, they cannot perceive or see many of the things that those that are seasoned on the ascension path can sense and know.

During Light Body activation, the process includes the sequential opening of twelve seals which give access into the next set of higher dimensional perception, that is based upon the individual's personal holographic blueprint and the station of identity's position in the clock shields. The clock shield templates are the mechanism by which our stations of identity perceptions in other timelines remain in their respective locations in time and space. These are other lifetimes that our consciousness has experienced while incarnated within the different positions of timelines, that could be considered linear perceptions we remember from the past, present or future. This gives our consciousness the sense of individuation and lends to the perception that our consciousness identity is moving through a linear time cycle happening within a particular density. It is the function of the biological clock shields that give us the experience of moving through timelines and accumulating lessons for consciousness growth, along with the process of biological aging.

At the planetary level during the Ascension Cycle failsafe mission upgrades, we have received a series of plasma transmissions of time matrix codes that are for the purpose of gradually opening each of the density locks that further allow consciousness access into perceiving higher dimensions and parallel realities. The first twelve of these time matrix codes relate to each particular dimensional layer in our Universal Time Matrix and are designed to gradually open into each section of the harmonic universes. The first set of twelve codes are Universal time codes that correspond to each dimensional layer of the twelve timelines, they are released in sets of three that match the harmonic universe configuration. Personality matter codes, Soul codes, Monadic codes, and Avatar codes are all included in the total release of Universal time codes that open each density layer for integrating those specific consciousness layers for supporting biological ascension.

Additionally, when the spiritual initiate is integrating the Avatar Harmonic Universe layers of the Lyran histories, there are higher Diamond Sun Body activation codes that release dimensional locks located at that level of the spiritual-energetic bodies. These are called Immanuel Christ codes, Yana Sophia codes and Manu coding. Yana Codes and Immanuel Codes are a part of Hieros Gamos and sacred marriage of the Risen Christos, the merge of both light and sound fields to unify the currents within the consciousness bodies on the Lyran timeline. When Immanuel-Christ codes are called for release, they open light currents of that dimensional spectrum of frequency into the spiritual bodies and then into the radial cord which links into all of the spiritual body layers of the Personal Christ, as well as the higher spirals of light fields that directly merge into the God Source. Immanuel-Christ codes are horizontal and are the masculine principle of light fields of current. Yana Sophia codes are vertical and the feminine principle of the sound fields of current. The Manu Codes represent the void or still point of creation. Manu codes have been recently upgraded and are now directly resonating with the dimensions correlating to upgraded dark matter in Harmonic Universe 6. This benevolent gift has been included in the Christos Mission upgrades for building out the Universal Mother Dark Matter Matrix to correct the problems this planetary system has with the blended reality issues, such as dark matter corruption, black goo, AI dodecahedrons and shadow elementals.

During this stage of the Universal time code transmissions, the planetary solar plasma activations have extended out into the next layers which now include the integration of the twelve codes of the 36D Sceptre Pillars and further, the twelve codes of the 48D Templar Reuche. During this incredible phase of accelerated consciousness transformation, the planet undergoes its next stage of ascension through a major global initiation into the Cosmic Mother Amoraea Shield, in order to embody the Cosmic Clock Templar Reuche in the Albion Light Body on 2-22-2022. Thus, for the ongoing process of the planetary and human ascension, those ready to receive these Emerald Order transmissions will begin the next stage of consciousness expansion with the series of activations for the twelve Templar Reuche Codes coming from the Cosmic Clock, which will further activate the hara centers in sequential order to prepare for appropriate embodiment levels.

End of Part 4.
