Winter Solstice 22nd December 2019 4:20 BST London UK

Before this month's New Moon on December 25th/26th the Winter Solstice takes place on December 21st / 22nd depending on where you live. The Solstice marks the time, when the Sun enters Capricorn and, in the North Hemisphere, we experience the shortest period of daylight and the longest period of night.

The Spring Equinox in March, the Summer Solstice in June, the Autumn Equinox in September and the Winter Solstice in December are pivotal moments, 'Markers in Time' – their rhythm and constancy connecting us into the Greater Cycles of the Cosmos and to the Seasons of Nature as we journey around the Sun.

These 'Markers', were recorded by the Babylonian priests, forerunners of the Druids, the ancient priests and astronomers, who, for

thousands of years at sacred sites, like Stonehenge, observed the Planets and celebrated the *Return of the Light* at the Winter Solstice, when once again, in due and perfect time, the Sun would bathe the Earth with vitality and heat, heralding Nature's rebirth. The ancient Druids were wise, learned and mystical Souls who had a deep connection with the Essenes, sharing a Babylonian/Egyptian rich heritage, each being the Custodians and Guardians of Ancient Wisdom and Truth.

At this time of the year when darkness, in the Northern Hemisphere, shrouds the Light, their Truth still remains – it is a time for inner reflection, remembrance and rebirth as we journey through the Consciousness and Light of the Constellations, the one-pointed aspiration of Sagittarius leading to the Mountain Top of initiation in Capricorn.

The Constellation of Capricorn is symbolised by the two horned Goat - representing the duality of Spirit and matter - a sure-footed creature who, through perseverance, determination and inner focus climbs to the mountain top to receive Initiation. Capricorn links to the Earth element and at the egoic level, the individual can be totally attached to the material plane.

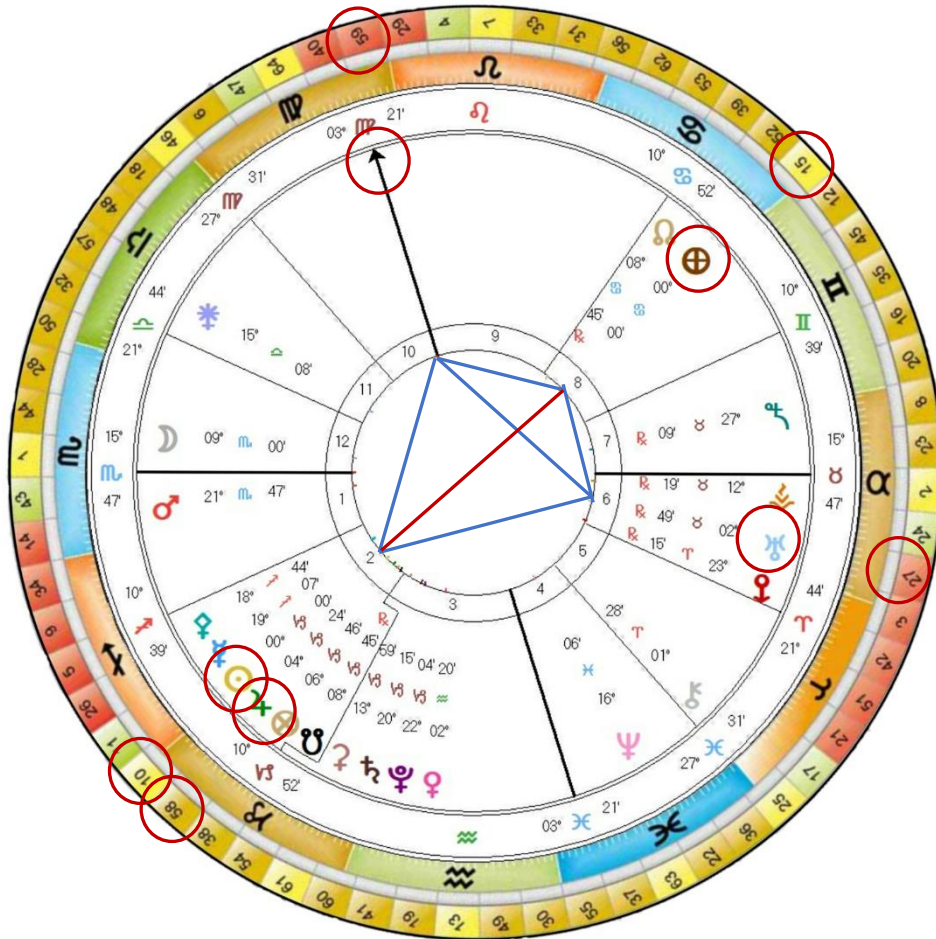

The planet Saturn is the ruler of Capricorn and at this level of consciousness can create a sense of carrying '*heavy baggage*' as deeply embedded emotional and mental patterning keeps the individual as a prisoner of form, until some Light breaks through this density of belief.

Capricorn is most closely connected to the Third Initiation and flows with the 1st, 3rd and 7th Rays. This combination gives Capricorn the ability and strength to eliminate anything that has been previously created and bring about a new Form for the manifestation of the Plan. Ultimately, Capricorn is the Gateway into the Immortal Life of the Initiate as the transformed '*two-horned goat*' becomes the Unicorn, whose single horn reveals the one-pointed resolve of the Initiate, in whose consciousness matter and Spirit are One.

Great works are performed not by strength, but by perseverance

CHART FOR THE WINTER SOLSTICE

Here is the chart for the Winter Solstice in which you will see that the Sun and Jupiter are close together in the sky, at this time, but each are holding a different sphere of Consciousness – the Sun on GK 10 and Jupiter on GK 58 – creating a Kite formation with Uranus on GK 27, the Earth on GK 15 and the Midheaven, or Mountain Top on GK 59. This is a chart of great expansion, offering freedom and the ability to break through limiting concepts – a time to step away from separation and for recognising and seeing All as part of the One.

We are, at all times held within the Consciousness of this Universality, the I AM Presence. It is only our emotional and mental bodies that distort this awareness. When we step into ‘personality’ and personal identification then we begin to wrap our ‘hopes’ and ‘dreams’ and our ‘dissappointments’ around this clear channel, ultimately becoming separated from the truth of our Being.

So it is perhaps a great Cosmic Joke and at the same time the Greatest Blessing that at each Winter Solstice the Light of the Sun is on Gene Key 10 flooding us with the remembrance to move out of the **Shadow of Self-Obsession** into the **Gift of Naturalness** so that ultimately we might reside in the **Siddhic State of Being**.

Gene Key 10, known as **Being at Ease**, defines the journey from the deepest valley to the Mountain top. At the Shadow Level of this key ‘People are obsessed with how they feel, how they look, what they own and where they live. Through the lens of the 10th Shadow all you see when you look at others is people you would like to change

– thus you find it difficult to accept others for their uniqueness. **Even when Self-obsession takes the form of a Spiritual search this too can become a trap.'**

'As one of the keystones of human individuality, the 10th Gene Key and its frequency bands point towards one of the deepest of all human issues – the notion of self-love. The Gift of Naturalness is a gift that waits within every single human being. It is the centre of your Being and only through this centre can you express your own creative uniqueness. The life of every individual human being is a journey through the frequencies of this 10th Gene Key.'

'At the Gift level there is a huge releasing of energy through your being, out into your life – an intense creativity and playfulness. The Gift of Naturalness cannot be practiced and copied it can only emerge through a rising sense of inner freedom and spaciousness. Naturalness unfolds through stages and the final flowering of your inner Being manifests as a challenge to the current norm, since your true nature is always found at the cutting edge of evolution. The only word that even gives a hint of what the 10th Siddhi holds is the word Being. The 10th Siddhi is destined to be deeply misunderstood by all those who do not live in its embrace.'

'Through the 10th Siddhi a great lightness is born and a great humour concerning life itself. The 10th Siddhi is truly a beautiful expression of Consciousness coming through the human form. These are people whose awakening encompasses all existence. The intense focus on oneself that comes through the 10th Gene Key finally breaks its identificaion with form and experiences everything as Self, with Love as the fluid in which the multifarious aspects of the Self are floating. You can see how easily misconstrued the message from this 10th Siddhi can become – especially in today's world in which we humans are being called to participate more and more in our own evolution.'

'The 10th Siddhi sees the beauty of the game of evolution but has no alternative but to undermine it. Being undermines everything - it does not allow identification with anything outside the wonder of the present moment. In the 10th Siddhi there is no sense of I – there is just Consciousness expressed as Being'.

This potential is being expanded and intensified by Jupiter on Gene Key 58 known as **From Stress to Bliss** which is assisting us to move out of the **Shadow of Dissatisfaction** into the **Gift of Vitality** and on to the **Siddhi state of Bliss**.

'The moment you accept your plight as a human being eternally driven to seek fulfilment in the future, everything in your life changes. The energy that has been seeking an outlet into the world through the Shadow of Dissatisfaction is turned back upon itself, resulting in a kind of implosion of inner vital force, which catalyses micro processes within your physiology – in short you begin to become yourself once again. At the Gift frequency Dissatisfaction now begins to turn into joy. This joyousness lies within every human being and is nothing short of Life expressing itself without resistance. Your mind becomes quieter – your relationship to the future changes and this can be a time of intense physical transformation. The Joyousness we seek as individuals is intimately tied to the joyousness of the collective – this is why the 58th Gift's delight is to work so tirelessly in that direction.'

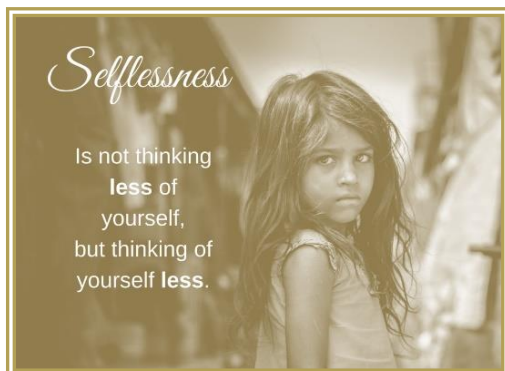

As your identification with the future progressively loosens, you are brought more and more deeply into the present moment. Your core Dissatisfaction is being transformed into Vitality.

'As the frequency of your Vitality attains a higher and higher pitch, at a certain point it peaks and catalyses a spontaneous shift in awareness. This vital force burrows so deeply into your being that it triggers a process within your DNA known as Enlightenment. When Consciousness comes, it comes into you like a flood wiping you clean in less than a microsecond. It is one of the greatest mysteries of existence.'

*'Once a being has realised Enlightenment through the 58th Siddhi they become entirely unfocussed. **Their awareness stretches into infinity, their gaze becomes unfixed and dreamy and their heart is so full that it bursts with Love for all creation – everything reverts to its Pure and Pristine state of Being.** No matter what one thinks does or says the experience of Enlightenment cannot be attained through seeking – whether Bliss or Honour or Illumination, each Siddhi state is outside of our grasp. **Finally you realise that the Siddhi is present within the Shadow just as the flower is present at all times in the seed.'***

Uranus, the Planet of the Higher Mind is in Taurus – the last time it was passing through this Constellation was from 1934-1942 manifesting through the Taurean 4th Ray of *Harmony through Conflict*. However, as Uranus transits through Taurus it has the ability to inspire individuals as to how they might lead others out of the darkness of ignorance and into the Light of Universality.

Uranus, which is just beginning its seven year transit through Taurus at 3^o is on Gene Key 27 moving us through **Selfishness to Altruism to Selflessness** reflecting the interconnectedness that underpins all of our lives – that what we do for another we do for our self.

*'Purpose flows from Altruism like water from a spring – connecting you into your Higher Purpose – it bubbles up inside you, creating warmth and goodwill, which spreads to others. **The true nature of the 27th Gift is generosity, which is primarily about caring for others and nature generally.'***

*'At a high frequency level the 27th Gift gives off a powerful aura of trust which is immediately felt by others. Such an aura of trust allows others to let down their guard and open themselves up to nurturing, sometimes for the first time in their lives. **At a deep genetic level, the presence of this 27th Gift engages a feeling of communal security through its strong resonance to the group mind. As such it is one of the most powerful healing Gifts in the whole genetic matrix.'***

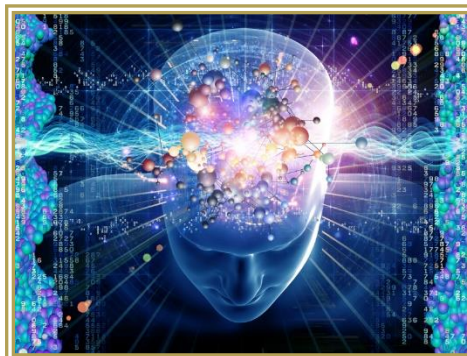

*'Known as the Doctrine of Harmlessness, the 27th Siddhi of Selflessness has manifested in the lives of many saints throughout history. Selflessness is an absolute pure yearning to provide succour to others. There is no sense of self-consciousness in it. Such people have made a quantum leap and the Siddhic energy available to them is enormous. **Despite endlessly giving of themselves to others, they are not depleted, but are continuously nourished by the refined currents of the aura of Love surrounding them.** The Mathematics of Love are built into the structures of all life – and here in the 27th Gene Key is the Divine Law of Philanthropy – the Love of Humanity. At the Siddhic level this Gene Key becomes capable of miraculous healing.'*

At the time of the Winter Solstice for this Chart, Uranus is making a 120^o aspect to the Midheaven/Mountain Top of the chart at 3^o Virgo on Gene Key 59 moving from **Dishonesty to Intimacy to Transparency** emphasising and underlining all that has been so far shared – for

*'Beyond the transmutation of the Shadow of Dishonesty into the Gift of Intimacy lies a further transformation in which genetic mutations will take place within the brain chemistry of the pineal and pituitary glands. **This process will lead to the dawning of the 59th Siddhi - the Siddhi of Transparency.***

The purpose of the 59th Gene Key is to breakdown all barriers that stand in the way of union. The ultimate role of the four Gene Keys, the 4th, 7th, 29th and 59th is to bring the human family into realisation of its state of Higher Union with all of Creation.

*This is the epoch we are now entering, in which the mutation of the solar plexus equates to the opening of our Planetary Heart Centre, when we once again **remember that every man and woman is our genetic brother and sister and no single individual, family, tribe or nation is an island. We are One.'***

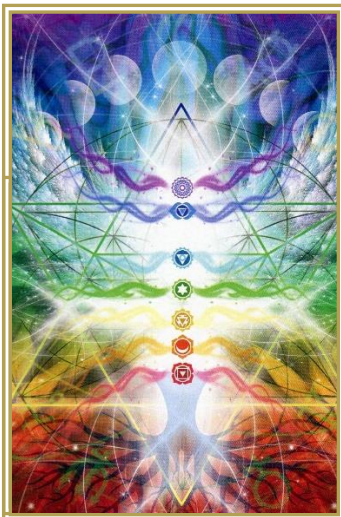

And finally, for this Kite Formation, the Earth is on Gene Key 15 – known as the **Eternally Flowering Spring** it takes us out of **Dullness**, into **Magnetism** and beyond to **Florescence**.

*'The 15th Gene Key is the key aspect of a complex set of genetic blueprints in human beings known as **The Ring of Seeking**. It is this codon in your genome that initiates your evolutionary journey from being unaware of your true nature to your eventual awakening as an expression of Divine form. The 15th Shadow manifests whenever a person's spirit feels low. **Your attitude also affect's life's events - this is the first Law of Magic - experiences mirror attitude.**'*

*'The 15th Gene Key offers a powerful portal into life's mysteries. **It is one of the Gene Keys that bridges humans with other life forms and in doing so it connects us profoundly to the living spirit of nature or Gaia.** Just as Magnetism holds families of the same species together people with the 15th Gift feel a deep kinship with humanity. The Gift of Magnetism makes a person physically glow with life force - it is a Gift filled with enthusiasm and openness and Love. The 15th Gene Key is such a powerful portal into life's mysteries.'*

Just as Magnetism holds families of the same species together people with the 15th Gift feel a deep kinship with humanity. The Gift of Magnetism makes a person physically glow with life force - it is a Gift filled with enthusiasm and openness and Love.'

*'Florescence refers to a process of exponential bursting into flower – as though the focus is not simply on a single flower, but an entire tree of flowers all bursting into bud at the same time. **Florescence is the ultimate flowering of your higher self. Florescence cannot be chased, hurried or enforced. It is a state that occurs to humans sporadically, no one can predict if or when it will occur to a particular person.** However, when it does arise that person is surrounded by light, magic and a tangibly magnetic aura.'*

*'As the zenith of human magnetism, Florescence manifests like a supernova through the human aura and once begun it keeps expanding and expanding into deeper and deeper dimensions. **Florescence depends upon nothing. It cannot be created - not by meditation, good karma or by any form of effort, not even by effortlessness. Florescence is Grace. When you come into perfect alignment with Gaia, then, in the words of Christ, you mystically "Inherit the Earth".'***

At the time of the New Moon on 25th 26th December, there will be a powerful Solar Eclipse* taking place which will amplify and extend the potential of these energies over a six month period. The Sun Moon and Jupiter will be together on Gene Key 58, but the focus at this time, however, flows through Chiron, as it will be making a 90° angle, known as a T Square, to the Sun, Moon and Jupiter as well as to the Earth.

Chiron, only 'discovered' in 1977 links us to the Christos energy in that it brings more Light into the DNA and cellular system and heals ancestral wounds. Its orbital path goes out to Uranus and back to Saturn bringing these higher frequencies of Light back into the world of form. Chiron takes some fifty years to make a transit of the Sun and has just begun its passage through the Constellation of Aries, entering Aries in May 2018 where it will remain until April 2027.

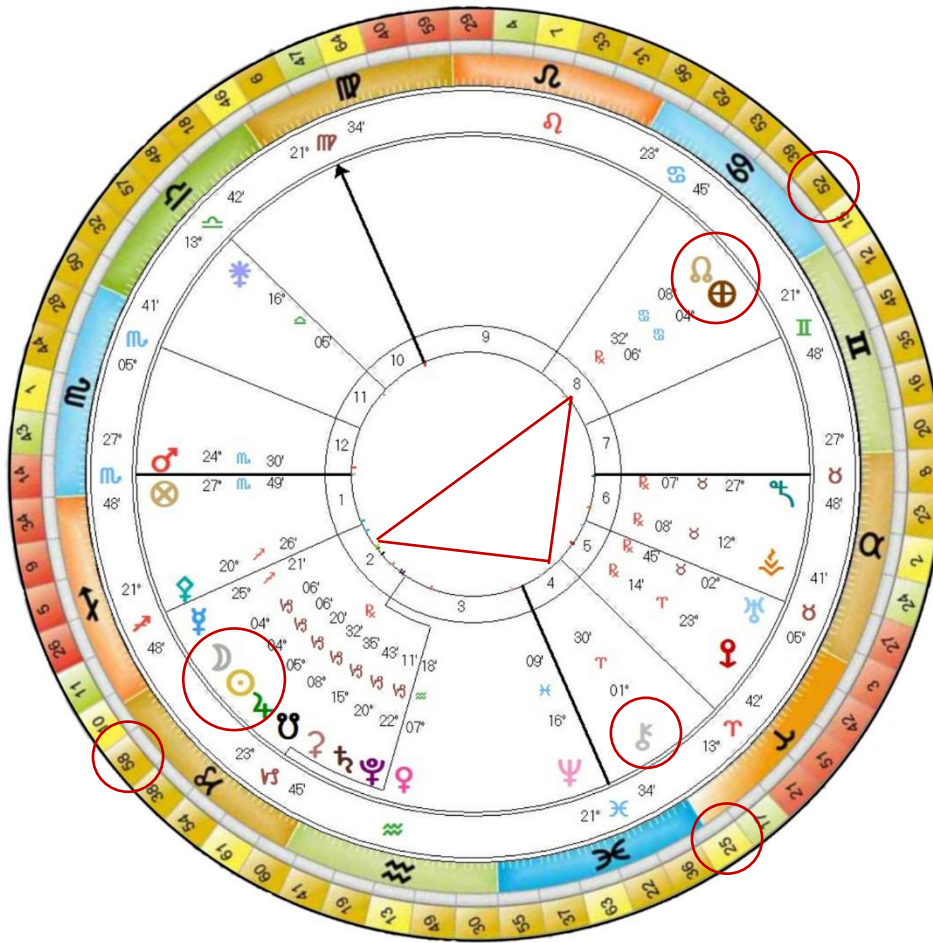

Looking at Chiron's symbol you will see that it represents a Key – a key which unlocks the remembrance of who we truly are. The Constellation of Aries, when resonating from the Shadow links directly to the ego to the 'I am' the 'Me' of the personality.

As a healer, Chiron seeks to restore the Divine 'I AM' Presence – so that we may walk as whole and healed Masters of Manifestation for the benefit of All Life.

CHART FOR THE CAPRICORN NEW MOON

Capricorn New Moon 26th December 2019 5:12 UT London UK
<https://www.timeanddate.com/moon/phases>

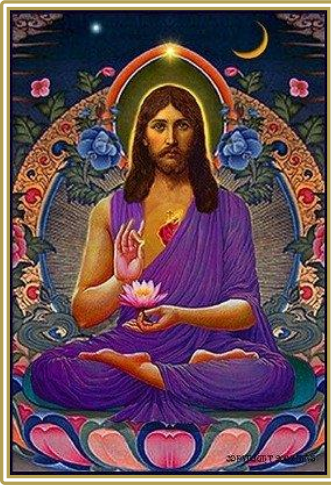

You will see from the above chart that Chiron is on Gene Key 25, known as the **Sacred Wound**, which at the Shadow level creates **Constriction**, a seed which can flower into **Universal Love**, through the Gift of **Acceptance**.

*'If there is a single Gene Key among the 64 Gene Keys that captures the essence of the entire work, it is this 25th Gene Key. Within the 25th Gene Key lies the secret that men and women have always sought – the secret of love. Here too lies the antithesis of love, the Shadow of Constriction. **Constriction exists wherever love is absent and it is the underlying source of all human suffering.***

'Constriction which was felt by our ancestors as they struggled from their births to their deaths - a Sacred Wound that is wound around the very helix of all human DNA. As we learn to face our wounds our journey becomes clearer and easier- we begin to walk the path from fear to love and through Acceptance the wound begins to unwind and another higher destiny opens before us.'

*'Here in the 25th Gift we arrive at one of the greatest and most powerful of all human Gifts, the Gift of Acceptance. **The Path of Love is the path of Acceptance.** Acceptance is based on taking the soft approach to life. **In order to accept something about yourself, and especially something uncomfortable, it first must be recognised you must have the courage to face your Shadow.** The only way to transform the Shadow is to have the courage to simply feel the fear. Acceptance is akin to "Spiritual Springtime" where everything seems new again, flowing more easily and freely.*

The 25th Gift makes it difficult to hold any resentment, judgement or indeed worry about life – for now you are carrying the Seed of Love. **When you can finally accept everything in your life just as it is right now you will have embraced the human wound.** As you relax the layers surrounding the wound deep inside you, you feel the flow of Love moving once more within your being.'

'The 25th Siddhi is a special Siddhi, whether it happens to be within your hologenic profile or not. Every Gene Key exists inside each of us and the 25th Gene Key is the primary archetype of Love. **The 25th Siddhi is Love itself as the Source of all and in this sense it can be called Universal Love.** The Sacred Wound that hides within each human being can be understood at three levels of consciousness – at the Shadow frequency the wound maintains human suffering, at the Gift frequency the wound provokes humanity to evolve and **at the Siddhic frequency the wound reveals humanity's true nature as an Expression of Universal Love**'.

'Those Beings who have attained realisation through this 25th Siddhi become, in some form, legends. Whether Buddha or the Christ – the aura of such a person shines like a Light down the centuries and is felt within the bloodlines of all future generations.'

'Every time someone attains the 25th Siddhi a great genetic constriction is removed throughout Humanity. The bodies of these people have undergone a radical transformation in order to be the receiver or chalice for pure Consciousness.'

As we disengage from the busyness of this Season, as we centre ourselves within the Spaciousness, Peace and Stillness which is flowing through the Cosmos and held at the centre of our Being, we align with the Earth and the Sun Moon and Jupiter which are impressing Gene Keys 52 and 58.

These two great Siddhis, the 52nd and the 58th, mirror one of the great Universal concepts of geometry and physics – the torus. **Within the human DNA the torus at the heart of all being is directly experienced through the state of Enlightenment which unites Stillness with Bliss.** At the Siddhic level adrenaline is transmuted into rarified hormones and neurotransmitters that induce Bliss and Stillness throughout the body. **This influx of Stillness into our Planetary aura will make it possible for millions of people to follow their true destiny into far wider service of the whole.**

As we approach the Festival of Christ Mass we can see how the Cosmos is enfolding us in this powerful potential – the teachings of Christ and other Masters, echoing throughout the Ages, within the very centre of our Beings, to Awaken us to the Truth of Who We Are.

May Peace, Joy and Stillness be with us All at this time of Celebration and Remembrance.

All Love and Blessings.
